The International Association for Dental Research (IADR), headquartered in Alexandria, Va., USA, is a nonprofit organization with more than 11,000 members worldwide. Its mission is:

(1) to advance research and increase knowledge for the improvement of oral health worldwide;

(2) to support and represent the oral health research community;

and (3) to facilitate the communication and application of research findings.

MESSAGE FROM THE PRESIDENT

The International Association for Dental Research (IADR) represents the greatest concentration of craniofacial researchers in the world. Their extraordinary findings create paradigm shifts in fundamental science, have a dramatic impact on clinical practice and change the lives of patients. IADR is committed to supporting and communicating these findings.

IADR remains a modern, robust organization by embarking on pathways to optimize our value to members. Through the creation of Regions, we are capitalizing on geographic proximity to stimulate collaborative research and identify solutions to regionally based obstacles. Since the Regional Development Program’s inception, more than $750,000 has been invested in regional initiatives that have leveraged many ideas into action. For example, the Latin American Region of the IADR used its investment to seed a multi-country training program in epidemiology research, with particular emphasis on early childhood caries.

The Global Oral Health Inequities: the Research Agenda (GOHIRA), initiated at the 2010 IADR General Session & Exhibition in Barcelona, Spain by then IADR President David M. Williams, now continues its efforts to formulate coherent priorities for research and implementation/translation of research findings through publications, engagement of IADR Scientific Groups and Divisions, the 2nd GOHIRA meeting in May and the 2011 AADR Fall Focused Symposium themed Oral Health Disparities Research and the Future Face of America. This GOHIRA initiative has set the stage for future internationally strategic programs to magnify the impact of craniofacial research.

As you read this report, you will learn more about IADR’s impact, along with its 2011 achievements and activities. You will also gain insight into IADR’s planned initiatives that will move the organization into the future.

As we move forward, I invite you to join us in the journey as we work toward advancing research and increasing knowledge to improve oral and systemic health worldwide.

Sincerely,

Dianne Rekow, D.D.S., Ph.D.
IADR President

Since the Regional Development Program’s inception, more than $750,000 has been invested in regional initiatives that have leveraged many ideas into action.
Under the leadership of IADR President E. Dianne Rekow and an outstanding Board of Directors, the International Association for Dental Research (IADR), celebrated an exciting year and made great strides toward the mission of advancing oral health worldwide. This year, IADR published the proceedings from the Global Oral Health Inequalities: The Research Agenda (GOHIRA) meeting. The GOHIRA initiative, which was established in May 2009 by the IADR Board and led by David M. Williams, articulates a program of research that would have the potential to create measurable improvements in global oral health within five years. The Initiative continued in May with the success of the second GOHIRA meeting, where the five-year program and action plan were addressed. The final report will be circulated to the IADR membership for comments.

The IADR General Session & Exhibition in San Diego, held in conjunction with the Annual Meeting of the American Association for Dental Research and Annual Meeting of the Canadian Association for Dental Research, was highly attended and the research presented there was of high caliber. More than 5,600 people attended the meeting from 75 countries. Those attending the meeting could choose from among 4,041 scientific presentations (including 3,018 posters, 908 oral presentations, 47 poster discussions, 33 Lunch & Learning topics, 23 keynotes, 27 symposia, five hands-on workshops and three plenary sessions). Delegates also had the opportunity to visit the exhibit hall, which housed 69 exhibit booths: 45 commercial exhibitions and 24 educational exhibitions.

Another highlight of 2011 is that the Journal of Dental Research (JDR) increased its Five-Year Scientific Impact Factor from 4.195 to 4.389. In the Dentistry, Oral Surgery & Medicine” category, the Journal ranked #1 in Article Influence, according to 2010 Five-Year Scientific Impact Factor rankings, published by the Journal Citation Reports (JCR). These advances wouldn’t be possible without the support of IADR members and researchers who continue to publish their highly-regarded research in the Journal.

IADR continued to strengthen its global impact by partnering with the FDI, World Health Organization and the Dental Association of Thailand to co-host the Workshop on Effective Use of Fluoride in Asia, which took place March 22-24, 2011, in Phan-Nga, Thailand. In addition, IADR continues to work with the United Nations Environment Program Global Mercury Partnership in order to have scientific input in the negotiating process as it relates to the safe use of dental amalgam and the proper environmental management of dental amalgam waste.

To enhance the meeting experience for attendees, IADR, with AADR, released a mobile application for the meeting. The meeting app, which was supported by Android, Apple and BlackBerry, allowed attendees to view the most current schedule of events, exhibitor listing, floor plans and more. This was an exciting technology that IADR will continue to utilize at its 2012 General Session.

In closing, I am grateful for the members of IADR who have continued to support the Association and the mission of advancing oral health worldwide. I extend my thanks and appreciation to the IADR Board of Directors and IADR President Dianne Rekow who, along with all Board Members, works tirelessly to further the Mission of the Association.

Sincerely,

Christopher H. Fox, D.M.D., D.M.Sc.
Executive Director
GOHIRA INITIATIVE CONTINUES
In 2011, the IADR Global Oral Health Inequalities: the Research Agenda (GOHIRA) initiative continued and it was the focus of a special session of the FDI World Dental Congress in Mexico City in September. At the meeting, IADR representatives discussed the initiative and provided insight into some delivery initiatives in South America. Peter Cooney, chief health officer of Canada, attended the meeting and provided an overview of some of Canada’s initiatives to overcome inequalities in the delivery of dental care.

JDR INCREASES ITS FIVE-YEAR SCIENTIFIC IMPACT FACTOR
In 2011 it was announced that the Journal of Dental Research (JDR) increased its Five-Year Scientific Impact Factor from 4.195 to 4.389. In the “Dentistry, Oral Surgery & Medicine” category, the Journal ranked #1 in Article Influence, according to 2010 Five-Year Scientific Impact Factor rankings, published by the Journal Citation Reports (JCR). This latest report also shows that the JDR ranks #2 in the Two-Year Impact Factor rankings, with a rating of 3.773, and at .02261, the JDR continues to hold the highest Eigenfactor Score of journals published in the “Dentistry, Oral Surgery & Medicine” category.

IADR INSTITUTES TWO NEW AWARDS
In 2011, IADR instituted two new awards. The IADR Academy of Osseointegration Innovation in Implant Sciences Award sponsored by the Academy of Osseointegration is intended to help investigators pursue innovative and novel research in oral care that involves, but is not limited to, dental implant therapy. In its first year, one competitive award of up to $75,000 was provided to Min Lee, University of California, Los Angeles, USA and co-investigators Benjamin Wu and Tara Aghaloo. The second award that IADR instituted is the IADR Colgate Community-Based Research Award for Caries Prevention. This award of up to $75,000, sponsored by Colgate-Palmolive, Co., will be provided annually to recipients to advance research in the field of cariology to promote oral health improvement globally, with a focus on community-based research for the prevention and management of caries. Denise Bailey, Cooperative Research Centre, The University of Melbourne, Australia received this inaugural award along with her co-investigators Margaret Stacey, Meredith Temple-Smith and Marie Pirotta.

IADR LAUNCHES ONLINE KNOWLEDGE COMMUNITY
This year, the International and American Associations for Dental Research (IADR/AADR) launched an online Knowledge Community. The Knowledge Community (www.iadr.org/knowledgecommunity) provides access to recorded materials, blogs and links to social media.

IADR LAUNCHES MOBILE APPLICATION FOR ITS GENERAL SESSION & EXHIBITION
IADR, with the American Association for Dental Research (AADR) released a mobile application for the 89th IADR General Session & Exhibition, held in conjunction with the AADR Annual Meeting and CADR Annual Meeting. The meeting app, which was supported by Android, Apple and BlackBerry, enhanced the overall attendee experience and allowed them to view the most current schedule of events, exhibitor listing, floor plans and more.

AMER CONFERENCE RAISES ORAL HEALTH AWARENESS IN NIGERIA
Themed “Building Capacity for Improved Oral Health Delivery,” the 3rd Conference of the IADR Africa/Middle East Region (AMER) was held in conjunction with the Nigerian Dental Association. The conference occurred September 27-30, 2011, in Abuja, Nigeria. The Honorable Minister of State for Health Muhammad Ali Pate mentioned at a special ceremony that the date of the National Oral Health Week was changed to coincide with the AMER conference to increase the awareness of oral health in Nigeria.
INTERNATIONAL COLLABORATIONS

FDI
IADR, along with the FDI, World Health Organization (WHO) and the Dental Association of Thailand, co-hosted the Workshop on Effective Use of Fluoride in Asia, which took place March 22-24, 2011, in Phan-Nga, Thailand. The Workshop brought together leaders in the field of dental public health and included presentations on topics such as the public health burden of dental caries and the practical implications of the effective use of fluoride for disease prevention. The program also provided opportunities for shared experiences of fluoride administration in Asia, with specific emphasis on water; salt and milk fluoridation, varnishes, mouth rinses and fluoridated toothpaste. A special session was held to review fluoride administration strategies, specifically, the community approach, professionally administered fluorides and the efficacy of self-administered fluorides. The workshop ended with recommendations on strengthening the prevention of dental caries in Asia through the effective use of fluoride as emphasized by representatives of IADR, FDI and WHO. The Proceedings were published in the February 2012 issue of the IADR/AADR Advances in Dental Research, an E-supplement to the Journal of Dental Research.

WHO
The World Conference on Social Determinants of Health—convened by the WHO and hosted by the Government of Brazil—was held October 19-21, 2011. The conference, which was attended by more than 1,200 people from around the world, gave governments and stakeholders a forum to discuss necessary steps to tackle the root causes of health inequities. IADR, as an NGO in official relations with the WHO, was invited to send representation. IADR Immediate Past President Maria Fidela de Lima Navarro represented IADR at the meeting. The conference was organized according to the following themes: Governance to tackle the root causes of health inequities: implementing action on social determinants of health; The role of the health sector; including public health programs in reducing health inequities; Promoting participation: community leadership for action on social determinants; Global action on social determinants: aligning priorities and stakeholders; and Monitoring progress: measurement and analysis to inform policies on social determinants. At the closing of the meeting the Declaration, Rio Political Declaration on Social Determinants of Health, was made available with a recommendation that the 65th World Health Assembly adopt a resolution endorsing the Political Declaration.

UNEP
IADR is a member of the United Nations Environment Program (UNEP) Global Mercury Partnership (GMP). The goal of the UNEP GMP is to protect human health and the global environment from the release of mercury and its compounds by minimizing and, where feasible, ultimately eliminating global, anthropogenic mercury releases to air, water and land. In February 2009, the Governing Council of UNEP agreed on the need to develop a global legally binding instrument (treaty) on mercury. UNEP Governing Council tasked governments to negotiate the treaty through a series of five conferences, called intergovernmental negotiating committee meetings (INC). IADR attended INC-2 in Chiba, Japan in January 2011 and INC-3 in Nairobi, Kenya in November 2011. IADR member Ken Anusavice attended INC-2 and IADR member Gottfried Schmalz attended INC-3, along with Executive Director Christopher Fox. The FDI also attended, and IADR and FDI worked in concert to make appropriate “interventions” as needed to support the continued availability of dental amalgam as a public health measure. The IADR/FDI strategy is a “phase-down” of dental amalgam as a result of increased oral health promotion activities, increased research into alternatives to dental amalgam and the appropriate environmental handling of amalgam waste.

UNITED NATIONS NCD SUMMIT
IADR was part of a loose coalition of organizations and interested parties advocating for the inclusion of oral health in the United Nations Non-Communicable Disease (NCD) Summit held in September 2011. We worked through the WHO Oral Health Program, the FDI, the American Dental Association (ADA) and others. AADR and ADA met with the United States Department of Health and Human Services global health unit to articulate the associations between oral disease and the four main NCDs under consideration (heart disease, diabetes, respiratory diseases, and cancer). IADR Immediate Past President Navarro met with Brazilian Ministry of Health representatives to deliver a similar message. Oral health is present in the final political declaration in two ways: 1) oral health is mentioned in one of the 42 recognition clauses and 2) in the action portion of the declaration, the WHO action plan on NCDs is promoted. The WHO Oral Health Program has previously integrated oral health into this WHO document. The declaration also addresses the importance of research and development in the prevention and control of NCDs.
The 89th General Session & Exhibition of the International Association for Dental Research, 40th Annual Meeting of the American Association for Dental Research and the 35th Annual Meeting of the Canadian Association for Dental Research took place March 16-19, 2011, in San Diego, California, USA. The meeting drew a total registration of 5,606 people from 75 countries.

Those attending the meeting could choose from among 4,041 scientific presentations (including 3,018 posters, 908 oral presentations, 47 poster discussions, 33 Lunch & Learning topics, 23 keynotes, 27 symposia, five hands-on workshops and three plenary sessions). Delegates also had the opportunity to visit the exhibit hall, which housed 69 exhibit booths: 45 commercial exhibitions and 24 educational exhibitions.

The Distinguished Lecture Series speakers were: Lynne-Marie Postovit, University of Western Ontario, London, Ontario, Canada, speaking on “Development Undone: Causes and Consequences of Tumor Cell Plasticity”; Bruce Beutler, The Scripps Research Institute, La Jolla, Calif, USA, speaking on “Sensing Microbes”; and Nobutaka Hirokawa, University of Tokyo, Japan, speaking on “Intracellular Transport and Kinesin Superfamily Molecular Motors (KIFs): Key Regulators for Neuronal Function.”

Development and Tumorigenesis.” Later in 2011, Beutler became one of three Laureates of the Nobel Prize in Medicine for discoveries of how the innate and adaptive phases of the immune response are activated and thereby provided novel insights into disease mechanisms. This work has opened up new avenues for the development of prevention and therapy against infections, cancer and inflammatory diseases.

Also featured were Group business meetings and receptions and the presentation of numerous awards and recognitions. During the meeting, E. Dianne Rekow was installed as the IADR president and she gave her inaugural speech titled “The Real Big Question” (J Dent Res 90: 825-826).

New technologies were debuted at the meeting to enhance the overall experience. IADR offered a mobile application that was supported by Android, Apple and select BlackBerry devices. Attendees could use the 2011 meeting app to view the most current schedule of events, exhibitor listing, floor plans and more. In addition to the app, IADR/AADR recorded select symposia, including recordings from Distinguishes Lecture Series presenters Lynne-Marie Postovit, Bruce Beutler and Nobutaka Hirokawa, and made the recordings available at the new IADR/AADR Knowledge Community.
RESEARCH BREAKTHROUGHS

In 2011, the Journal of Dental Research’s increased its Five-Year Scientific Impact Factor from 4.195 to 4.389 and it ranked #1 in Article Influence according to 2010 Five-Year Scientific Impact Factor rankings, published by the Journal Citation Reports (JCR). The Journal continues to hold the highest Eigenfactor Score in the field.

FGF-2 STIMULATES PERIODONTAL REGENERATION
J Dent Res 90: 35-40
This study represents the largest multi-center human clinical trial using growth factor therapy to repair tooth-supporting osseous defects.

AN ASSESSMENT OF BONE FLUORIDE AND OSTEOSARCOMA
F.M. Kim, C. Hayes, P.L. Williams, G.M. Whitford, K.J. Joshipura, R.N. Hoover, C.W. Douglass, and the National Osteosarcoma Etiology Group
J Dent Res 90: 1171-1176
This study of using actual bone fluoride concentrations as a direct indicator of fluoride exposure represents our best science to date and shows no association between fluoride in bone and osteosarcoma risk.

RISK FACTORS FOR OSTONECROSIS OF THE JAWS: A CASE-CONTROL STUDY
A. Barasch, J. Cunha-Cruz, F.A. Curro, P. Hujoel, A.H. Sung, D. Vena and A.E. Voinea-Griffin
J Dent Res 90: 439-444, and
ONJ IN TWO DENTAL PRACTICE-BASED RESEARCH NETWORK REGIONS
J.L. Fellows, D.B. Rindal, A. Barasch, C.M. Gullion, W. Rush, D.J. Pihlstrom and J. Richman, for the DPBRN Collaborative Group
J Dent Res 90: 433-438
The results of these studies may have an important impact to the developing of better definitions for osteonecrosis of the jaw.

FLAGELLIN ENHANCES SALIVA IGA RESPONSE AND PROTECTION OF ANTI-CARIES DNA VACCINE
This study highlights the exciting potential of using vaccines to protect against dental caries.
Through the IADR Scientific Groups & Networks, members are able to collaborate with leading researchers in more than 20 specialized fields.

- Behavioral, Epidemiologic and Health Services Research
- Cariology Research
- Craniofacial Biology
- Dental Anesthesiology Research
- Dental Materials
- Diagnostic Sciences
- Education Research
- Evidence-based Dentistry Network
- Geriatric Oral Research
- Implantology
- International RDC/TMD Consortium Network
- Microbiology/Immunology
- Mineralized Tissue
- Network for Practice-based Research
- Neuroscience
- Nutrition Research
- Oral and Maxillofacial Surgery
- Oral Health Research
- Oral Medicine and Pathology
- Periodontal Research
- Pharmacology/Therapeutics/Toxicology
- Prosthodontics
- Pulp Biology and Regeneration
- Salivary Research
- Women in Science Network
IADR continues to strengthen research efforts and dental research activities in all areas of the world through the Adopt-a-Member Program, the Meeting Dividend Program and the Regional Development Program.

ADOPT-A-MEMBER
The IADR Adopt-a-Member program supported 105 members in 2011, in the following Divisions: Argentine, Brazilian, Chilean, Chinese, Colombian, Continental European, East and Southern Africa, Ecuadorian, Nigerian, Panamanian, Peruvian, Southeast Asian, Uruguayan and Venezuelan. Designed to provide IADR members with the opportunity to support colleagues who did not have the means to become members, the program aims to support oral and dental researchers in developing parts of the world. Fifty-six members were supported by the IADR/GlaxoSmithKline Adopt-a-Member program in China and India, and Colgate-Palmolive Company sponsored 94 members in East and South Africa. The IADR/Johnson & Johnson Healthcare Products Adopt-a-Member program supported 161 members in Latin America. The program raised nearly $25,000.

MEETING DIVIDEND
Through the Meeting Dividend Program, nearly $144,000 was distributed to 25 IADR Divisions, including the American, Argentine, Australia/New Zealand, Brazilian, British, Canadian, Chilean, Chinese, Colombian, Continental European, East and Southern African, Irish, Israeli, Japanese, Korean, Kuwaiti, Mexican, Nigerian, Peruvian, Scandinavian, South African, Southeast Asian, Uruguayan and Venezuelan Divisions. Each Division had representation at the IADR General Session & Exhibition in San Diego, California, USA, and received at least $1,000. The program offers additional funds that can be used at the Divisional level to develop membership and encourage research.

REGIONAL DEVELOPMENT
In 2011, the IADR Regional Development Program (RDP) awarded $63,500 in grants to the following Division and Sections:

- **Israeli Division** for “Oral Research Methodology and Preliminary Epidemiological Study of Oral Health Status in Georgia.”
- **Peruvian Division** for “Multi-country Training Project on Clinical and Epidemiological Research Methods (Phase II) and Scientific Writing and Reporting Workshop for Latin American investigators.”
- **Mongolian Section** for “The National Survey of Oral Health Status of Children and Adults in Mongolia.”

The IADR Adopt-a-Member program supported 416 members in 2011.
AWARDS

IADR funded and administered $660,000—an all-time high—in the following awards and fellowships in 2011:

IADR/AADR William J. Gies Awards
IADR/Colgate Research in Prevention Travel Awards
IADR Academy of Osseointegration Innovation in Implant Sciences Award
IADR Colgate Community-Based Research Award for Caries Prevention
IADR David B. Scott Fellowship
IADR Distinguished Scientist Awards
IADR Distinguished Service Award
IADR E.W. Borrow Memorial Award
IADR/GlaxoSmithKline Innovation in Oral Care Awards
IADR Honorary Membership
IADR/Lion Dental Research Award
IADR/Toshio Nakao Fellowship
IADR/Unilever Hatton Competition and Awards
IADR Young Investigator Award

IADR/GLAXOSMITHKLINE INNOVATION IN ORAL CARE AWARDS
Supported by GlaxoSmithKline
In its seventh year of award support, GSK Consumer Healthcare has contributed more than $1.6 million. Each of the three 2011 winners received a $75,000 unrestricted research grant, which is funded by GSK Consumer Healthcare and administered by IADR. The 2011 winners were:

Scott De Rossi, Georgia Health Sciences University College of Dental Medicine, Augusta, USA and co-investigators Douglas Dickinson, Stephen Hsu, Stephen Looney and Kalu Ogbureke
“A Natural Formulation for Patients Diagnosed with Xerostomia”

David T. Wong, University of California, Los Angeles, USA
“SCPSS: Enabling Technologies for Salivary Biomarkers for Clinical Applications”

Hui Wu, University of Alabama at Birmingham, USA and co-investigators Suzanne Michalek and Christian Melander (North Carolina State University)
“Development of Small Molecules that Inhibit and Disperse Carciogenic Biofilms”

IADR GLAXOSMITHKLINE INNOVATION IN ORAL CARE AWARDS

IADR HONORARY MEMBERSHIP
The three most recent living IADR Past Presidents may select an Honorary Member who has made significant contributions to and/or supports dental research. This year, Honorary Membership was bestowed on Sir Michael Marmot - Director of the International Institute for Society and Health, and MRC Research Professor of Epidemiology and Public Health, University College, London.

IADR/AADR JOURNAL OF DENTAL RESEARCH “COVER OF THE YEAR, 2010”
This recognition is presented annually for the previous year’s JDR cover image that enhances the impact of the article, and is both scientifically novel and aesthetically pleasing. The “Cover of the Year, 2010” award was presented to:

C. Lang, M. Böttner, C. Holz, M. Veen, M. Ryser, A. Reindl, M. Pompejus, and J.M. Tanzer,

HERAEUS TRAVEL AWARD
The objective of this travel award, sponsored by Heraeus, is to encourage young investigators to undertake research in new and innovative testing methods of dental materials, and new ideas and approaches to improve and develop dental materials. The recipients of the 2011 Heraeus Travel Awards were:

Carina S. Castellan
(Universidade de São Paulo, Brazil)

Nathaniel Lawson
(University of Alabama at Birmingham, USA)

Neshka Manchorova-Veleva
(Medical University Plovdiv, Bulgaria)

Giulio Marchesi
(University of Trieste, Italy)

Hiroyuki Miyajima
(Osaka University, Japan)

IADR DISTINGUISHED SERVICE AWARD
This prestigious award recognizes a member who has not served as an IADR Officer, but has performed outstanding service to the Association or distinguished service over a period of time. The 2011 recipient is Gottfried Schmalz, University of Regensburg, Germany.

Then IADR President Maria Fidela de Lima Navarro presents the Distinguished Service Award to Gottfried Schmalz.
IADR DISTINGUISHED SCIENTIST AWARDS
Each of the 16 IADR Distinguished Scientist Awards recognizes a career of distinguished accomplishments in research and development.

Isaac Schour Memorial Award
Supported by an endowment provided by Dr. Bernard G. Sarnat and Rhoda G. Sarnat
Larry W. Fisher
NIH, Bethesda, Maryland, USA

Behavioral, Epidemiologic and Health Services Research Award
Supported by Unilever Oral Care
Helen Whelton
Cork University Dental School and Hospital, Wilton, Ireland

Basic Research in Biological Mineralization Award
Supported by Unilever Oral Care
Laurie Kay McCauley
University of Michigan, Ann Arbor, USA

Craniofacial Biology Research Award
Supported by DENTSPLY International
Yang Chai
Herman Ostrow School of Dentistry of University of Southern California, Los Angeles, USA

H. Trendley Dean Memorial Award
Supported by Colgate-Palmolive Company
Scott L. Tomar
University of Florida, Gainesville, USA

Research in Dental Caries Award
Supported by Johnson & Johnson Healthcare Products Division
Nigel B. Pitts
University of Dundee, Scotland, UK

Oral Medicine and Pathology Research Award
Supported by Unilever Oral Care
Deborah Greenspan
University of California, San Francisco, USA

Geriatric Oral Research Award
Supported by GlaxoSmithKline Consumer Healthcare
Patrick Finbarr Allen
Cork University Dental School and Hospital, Wilton, Ireland

Research in Oral Biology Award
Supported by Church & Dwight Company, Inc.
Salomon Amar
Boston University, Massachusetts, USA

Basic Research in Periodontal Disease Award
Supported by Colgate-Palmolive Company
Eric C. Reynolds
The University of Melbourne, Australia

Pharmacology/Therapeutics/Toxicology Research Award
Supported by Wyeth Consumer Healthcare
Kiyoshi Ohura
Osaka Dental University, Japan

Research in Prosthodontics and Implants Award
Supported by Astra Tech Inc.
Hugh Devlin
University of Manchester, England, UK

Pulp Biology & Regeneration Award
Supported by DENTSPLY Caulk
Jian Q. (Jerry) Feng
Baylor College of Dentistry, Dallas, Texas, USA

Salivary Research Award
Supported by Wm. Wrigley, Jr. Company
Massimo Castagnola
Catholic University of Rome, Italy

Wilmer Souder Award
Supported by William T. Sweeney Memorial Fund & the IADR Dental Materials Group
Stephen C. Bayne
University of Michigan, Ann Arbor, USA

Young Investigator Award
Supported by P&G Professional Oral Health, Crest Oral-B
Alastair J. Sloan
Cardiff University, Wales, UK

IADR/AADR WILLIAM J. GIES AWARDS
These awards, for the best papers published in the Journal of Dental Research, are presented in three categories: Biological, Biomaterials & Bioengineering and Clinical. The award is named for William J. Gies, the founder of the Journal of Dental Research. Nominations may be made by any person, and the papers to be chosen must describe work which has very significantly advanced knowledge in some aspect of dental research. Papers eligible for consideration are those published during the 12-month period (July-June) immediately preceding the IADR General Session. The award consists of a monetary prize of $1,000 and a plaque. The Gies Award is open to anyone who publishes in the Journal of Dental Research, the official publication of the IADR/AADR.

Clinical Research

Biological Research

Biomaterials & Bioengineering Research
IADR had 11,338 members in 2011, and added the following new Sections: Pakistan, Paraguay & United Arab Emirates.
MBERSHIP

following new Sections: Pakistan, Paraguay & United Arab Emirates.
REGIONAL REPORT

IADR has 25 Divisions and 15 Sections that comprise five Regions. IADR is organized into Regions for purposes of more effective and efficient delivery of IADR Member Services. Divisions are formed when a nation, or group of geographically related nations, with 50 or more members is approved by Council. Sections can be formed with 10 or more members. All Divisions and Sections are within one of the five Regions. IADR’s organizational structure is best poised to promote research around the world and grow membership.

AFRICA & MIDDLE EAST REGION
(East and Southern African, Egyptian [Section], Iranian, Iraqi [Section], Jordanian [Section], Kuwaiti, Nigerian, Saudi Arabian [Section], South African, Sudanese [Section], Syrian [Section] and United Arab Emirates [Section])

The 3rd Conference of the IADR Africa/Middle East Region, held in conjunction with the Nigerian Dental Association, was themed “Building Capacity for Improved Oral Health Delivery.” The conference took place September 27-30, 2011, in Abuja, Nigeria. This conference was an important event in dentistry in which scientists, specialists and general practitioners from all over Africa and the Middle East exchanged and deepened their knowledge. It also provided first-hand information on new developments, and current and future trends in dentistry. The Honorable Minister of State for Health Muhammad Ali Pate mentioned at a special ceremony that the date of the National Oral Health Week was changed to coincide with the AMER conference to increase the awareness of oral health in Nigeria.

ASIA/PACIFIC REGION
(Australian/New Zealand, Chinese, Indian [Section], Japanese, Korean, Mongolian [Section], Pakistan [Section] and Southeast Asian)

The Mongolian Section was awarded a Regional Development Program grant for the purpose of conducting a national oral health survey titled “The National Survey of Oral Health Status of Children and Adults in Mongolia.” The three main examiners for the study are experienced in preventive dentistry, paedodontology and restorative dentistry. The survey conductors have discussed practical issues associated with planning the including sampling, the need to ensure that ID numbers are not repeated in different survey districts and the need to maintain diagnostic quality through repeat examinations of around 10 percent of the sample.

Australian/New Zealand Division
The 51st Australian/New Zealand Division meeting took place September 25-28, 2011, at the University of Melbourne, Australia. The meeting was attended by 175 people and more than 100 abstracts were submitted for presentation. One of the highlights of the meeting was a visit and presentation by the Victorian Minister for Health David Davis. The meeting included parallel sessions that addressed new approaches to polymicrobial disease, public health, implant dentistry/periodontics, porphyromonas gingivalis, education and hypomineralization. In addition, there was an education symposium and workshops on both partnership building in research and on research funding.

Japanese Division
The 59th Meeting of the Japanese Association for Dental Research (JADR) was held October 8-9, 2011. Nearly 300 people attended this scientific meeting. Three special lectures were scheduled over the course of the meeting. The meeting was organized around three symposia focused on novel infrastructure technologies for constitutive innovation of clinical dentistry, brain mechanisms underlying regulation of oral functions, and host-parasite interaction through the epithelial barrier. Each symposium featured four researchers from Japanese universities.

Indian Section
The Indian Section of the IADR (ISDR) organized its 23rd annual convention at Chettinad Health City in Chennai, India, January 7-9, 2011. Nearly 2,000 students and scientists attending this meeting, including then IADR President Maria Fidela de Lima Navarro who gave a welcome address. During her address, she highlighted the importance of being in the IADR and stressed the importance of forming the Indian Division with IADR.
LATIN AMERICAN REGION
(Argentine, Brazilian, Chilean, Colombian, Costa Rican [Section], Ecuadorian [Section], Panamanian [Section], Paraguayan [Section], Peruvian, Uruguayan and Venezuelan)

Brazilian Division
The Brazilian Saliva Symposium was held at the Bauru School of Dentistry, University of São Paulo, on April 9, 2011. It was a successful meeting that attracted almost 200 attendees from 10 different states of Brazil, including the Amazon State. Nine full-day oral sessions took place at the meeting and 2,873 abstracts were presented. The poster sessions were divided into different levels: undergraduate, graduate and senior investigators. The Brazilian Division meeting also served as a forum for Scientific Groups to hold meetings. The meeting was sponsored by the São Paulo state foundation (FAPESP), Bauru School of Dentistry and the Brazilian Division of the IADR. It was conceived in preparation of the 90th General Session & Exhibition of the IADR to be held June 20-23, 2012, in Iguazu Falls, Brazil.

Uruguayan Division
The IADR Uruguayan Division held its sixth meeting in Montevideo, Uruguay, July 30, 2011. There were 185 attendees from Uruguay, Argentina, Brazil, Chile, Paraguay and Peru. The program was composed of 34 abstracts as oral presentations, a poster session and analysis of projects. Cutting-edge research was presented at this meeting and it proved to be an excellent opportunity for discussions and the exchange of research.

NORTH AMERICAN REGION
(American, Canadian and Mexican)

American Association for Dental Research
AADR held its 4th Fall Focused Symposium on November 3-4, 2011, at the Renaissance Washington, DC hotel. This year, the theme of the symposium was “Oral Health Disparities Research and the Future Face of America.” At this two-day scientific program, attendees had the opportunity to attend sessions, view 33 scientific posters, collaborate with colleagues and attend a panel discussion. The symposium brought together key opinion leaders, scientists from the NIH, NIDCR and U.S. Department of Health and Human Services, along with NIH-funded investigators and academicians. Newly appointed NIDCR Director Martha Somerman presented a session titled “Research to Address Oral Health Disparities: an NIDCR Priority.” The symposium was recorded and is available for download at the IADR Knowledge Community at www.iadr.org/knowledgecommunity.

Canadian Association for Dental Research
The Faculty of Dentistry at Dalhousie University, Nova Scotia, Canada, hosted a workshop themed “Closing the Gap Between Oral Health Research and Practice,” Thursday, October 27, 2011. The workshop focused on two oral health research projects in particular: 1) The Oral Health of our Aging Population (TOHAP) study - a province-wide survey of the oral health status of Nova Scotians age 45+, and 2) Oral Care in Long-Term Care Settings (the Trifacilities project) - a study that explored, and developed practical strategies to facilitate daily oral care provision to residents of long-term care facilities.

PAN EUROPEAN REGION
(British, Continental European, Irish, Israeli, Russian [Section], and Scandinavian)

Continental European and Scandinavian Divisions
The IADR Continental European Division held its 45th meeting, with the Scandinavian Division, August 31-September 3, 2011. This meeting took place in Budapest, Hungary. It was organized around scientific symposia, workshops, main lectures, oral sessions, poster and oral poster demonstrations. These sessions included basic and clinical research on caries, ceramics, composites, digital dentistry, erosions, halitosis, implantation, periodontitis, periimplantitis and tissue engineering, among others.

IADR is organized into Regions for purposes of more effective and efficient delivery of IADR Member Services.

FUTURE INITIATIVES

IADR TO PUBLISH SPECIAL JDR SUPPLEMENT ON CLINICAL RESEARCH

In 2012, the Journal of Dental Research will publish a supplement that encompasses all areas of clinical research in the dental, oral and craniofacial sciences. This peer-reviewed supplement will strive to bring emerging contributions in discovery and translational science to clinical application for the healthcare community. It will focus on addressing the need in the dental, oral and craniofacial sciences for a place unique to publish the highest quality research articles on clinical and translational research including, but not limited to behavioral sciences, epidemiology, cariology, oral & pharyngeal cancer, disease diagnostics, evidence based health care delivery, human genetics, health services research, periodontal diseases, and oral medicine, radiology and pathology. In particular, human clinical trials, and large epidemiological studies in the oral health sciences will be given priority for publication.

FUTURE MEETINGS
