The International Association for Dental Research (IADR), headquartered in Alexandria, Va., USA, is a nonprofit organization with nearly 12,800 members worldwide. Its mission is: (1) to advance research and increase knowledge for the improvement of oral health worldwide; (2) to support and represent the oral health research community; and (3) to facilitate the communication and application of research findings.

Message from the President

Working under the mission of advancing research and increasing knowledge for the improvement of oral health worldwide, the International Association for Dental Research (IADR) continues to be the global leader in dental, oral and craniofacial research.

In 2012, IADR experienced record growth along with the expansion of services to benefit its members. The Association recorded its highest overall membership with 12,793 people being part of this organization. Much of the growth was in Latin America in advance of the General Session in Iguacu Falls, Brazil. With the implementation of our high-impact governance structure, there are many new opportunities for all members to become actively engaged globally in our organization.

From a scientific perspective, these continue to be exciting times with major research findings reinforcing the importance of global oral health issues and the connection of oral health and general systemic health. In this context, IADR has been working on the research perspectives related to reducing inequalities in global oral health through the IADR-Global Oral Health Inequities Research Agenda® (IADR-GOHIRA®). This initiative has expanded into a formal IADR Scientific Network, the Global Oral Health Inequalities Research Network, which was established this year.

Science today is much more complex spanning multiple disciplines and technologies. Therefore, a team approach combining the expertise and talents of many scientists and clinicians is highly warranted to address critical oral health research problems. The IADR Board has organized a new Student Research and Training (STAR) Network (to be approved at the 2013 Council meeting), which is designed to engage students, trainees and fellows as life-long members. I hope that IADR members will continue to support our Association and its legacy so that we can excel on a global platform by working together to address oral health research problems and find critical solutions.

As you read this report, you will learn more about the many achievements IADR has made this year. I encourage you to be an active partner with IADR to ensure our future success and global relevance as the premier association for dental, oral and craniofacial research. As IADR members, we are each through our science probing the many facets of global health research together with a smile!

Sincerely,

Mary MacDougall, Ph.D.
IADR President
Under the leadership of President Mary MacDougall and a dedicated Board of Directors, the International Association for Dental Research (IADR) has successfully completed another year of vital accomplishments toward strengthening its mission of advancing oral health worldwide and fulfilling the needs of its membership.

This year marked the first time that IADR held its General Session in the Latin American Region. The meeting, which took place June 20-23, 2012 in Iguazu Falls, Brazil, was held in conjunction with the IADR Latin American Regional Meeting. More than 4,500 people from 67 countries were in attendance. This meeting also led to a record high in membership growth, with more than 12,700 members in 2012.

Another highlight of 2012 is that IADR formed two Scientific Networks: Clinical and Translational Science and Global Oral Health Inequalities Research; and one Scientific Group: Pediatric Oral Health Research. IADR Scientific Groups and Networks continue to be the backbone of the Association, and I’m pleased that IADR members recognize the value of collaborating with other researchers in IADR Scientific Groups and Networks.

To address the need in the dental, oral and craniofacial sciences for a place to publish the highest quality research articles on clinical and translational research, IADR/AADR published a clinical supplement to the Journal of Dental Research (JDR). This peer-reviewed supplement encompassed all areas of clinical research in the dental, oral and craniofacial sciences, and strived to bring emerging contributions in discovery and translational science to clinical application for the healthcare community. Due to its success, IADR/AADR will publish two special supplements in 2013.

In 2012, as a member of the United Nations Environmental Program Global Mercury Partnership (UNEP GMP), IADR was able to strengthen its global impact by participating in the UNEP Intergovernmental Negotiating Committee (INC) to develop a global legally binding instrument on mercury. IADR and FDI participated in the UNEP INC meetings to present the WHO Oral Health Program, dental research and dental profession views on dental amalgam which were under fire by the environmentalists due to the mercury content of dental amalgam.

I am grateful for the achievements IADR and its members have made this year and I appreciate the support of the entire membership. I extend my thanks to IADR President Mary MacDougall who, along with all Board Members, works tirelessly to advance the Association’s mission.

Sincerely,

Christopher H. Fox, D.M.D., D.M.Sc.
Executive Director
Highlights

IADR FORMS TWO NEW SCIENTIFIC NETWORKS AND ONE SCIENTIFIC GROUP
In 2012, IADR created two Scientific Networks: Clinical and Translational Science, and Global Oral Health Inequalities Research; and one Scientific Group: Pediatric Oral Health Research. Scientific Groups and Networks are the backbone of the Association and IADR encourages its members to join Scientific Groups and Networks and collaborate with other researchers.

IADR LAUNCHES NEWLY DESIGNED WEBSITE
This year, IADR unveiled its newly-designed website, the Web address is still www.iadr.org. The streamlined website is easier to navigate and it incorporates a social media component. In addition, users may now bookmark and share information directly from the website.

IADR/AADR INTRODUCE CLINICAL SUPPLEMENT TO THE JOURNAL OF DENTAL RESEARCH
IADR/AADR announced the publication of a clinical supplement to the Journal of Dental Research (JDR). This peer-reviewed supplement encompassed all areas of clinical research in the dental, oral and craniofacial sciences, and strived to bring emerging contributions in discovery and translational science to clinical application for the healthcare community. The JDR clinical supplement focused on addressing the need in the dental, oral and craniofacial sciences for a place to publish the highest quality research articles on clinical and translational research.

IADR HOLDS ITS FIRST MEETING IN THE LATIN AMERICAN REGION
For the first time, IADR held its General Session & Exhibition in the Latin American Region. The meeting took place June 20-23, 2012 in Iguazu Falls, Brazil, and was held in conjunction with the IADR Latin American Regional Meeting. More information about this historic meeting may be found on page 6 of this report.

MEMBERSHIP GROWTH
The IADR membership grew to a record high, 12,793 in 2012. Much of the growth was in Latin America in advance of the General Session in Brazil.

IADR ADDS TWO NON-DIVISIONAL SECTIONS
This year, the IADR Africa & Middle East Region added two non-Divisional Sections: Lebanese and Tunisian. IADR Sections can be formed with 10 or more members. The Lebanese and Tunisian section applications were presented to the IADR Council at the IADR General Session in Iguazu Falls, Brazil. Council approved the formation of the Tunisian and Lebanese non-Divisional Sections.
International Collaborations

**DENTAL MATERIALS INNOVATION WORKSHOP**

On December 10-11, IADR along with King’s College London and FDI sponsored the Dental Materials Innovation Workshop held on the campus of King’s College London. The goals of the workshop were to identify performance gaps in our current armamentarium of dental restorative materials, identify promising areas of dental materials research, and to develop a prioritized agenda and global action plan in dental materials research to address individual and population-level health with environmental compatibility and economic feasibility. The starting point for the workshop was the World Health Organization meeting themed “Future Use of Dental Materials for Dental Restoration” held in 2009, in cooperation with the United Nations Environment Program that concluded, “existing alternative dental materials are not ideal due to limitation in durability, fracture resistance, and wear resistance. Therefore, the meeting recognized the need for strengthening of research into the long-term performance, possible adverse effects, and viability of such materials.” The workshop included scientists from dental materials in academia and industry, as well as scientists from the broader materials science community and several promising areas of research were identified. The proceedings of the workshop will appear in a 2013 *Advances in Dental Research*, an e-supplement to the JDR.

**IADR-GLOBAL ORAL HEALTH INEQUALITIES RESEARCH AGENDA®**

In 2012, the IADR-Global Oral Health Inequalities Research Agenda® (IADR-GOHIRA®) initiative continued this year and a symposium titled “Reducing Global Oral Health Inequalities: What Can IADR Members Do” took place at the IADR/LAR General Session in Brazil. During the meeting, IADR-GOHIRA® Chair David Williams gave an overview of the IADR-GOHIRA® initiative. Some of the topics that were addressed were social determinants of health and their importance in childhood caries, environmental determinants and common risk factors along the life course as contributors to the general disease burden, and oral health inequalities in Brazil. In 2013, IADR/AADR will publish a special JDR editorial titled “IADR-Global Oral Health Inequalities Research Agenda®: An IADR Board Call to Action.”

**FDI**

IADR has agreed to support the FDI Global Caries Initiative by delivering the science to support the initiative. Nigel Pitts, the Caries Task Group chair to the IADR-GOHIRA® initiative and John Clarkson, IADR representative to the FDI Science Committee, are IADR’s main liaisons for this initiative. FDI activity regarding dental caries has focused on the development of a Caries Classification and Management Matrix which takes a preventive approach to caries management and integrates the International Caries Detection and Assessment System with other classification systems. On June 5, then IADR President E. Dianne Rekow and IADR Executive Director Christopher H. Fox met with FDI officials to discuss further opportunities for collaboration, leveraging the strength and visibility of dentistry in oral and systemic health.
90th General Session & Exhibition

The 90th General Session & Exhibition of the International Association for Dental Research, held in conjunction with the IADR Latin American Regional Meeting, took place June 20-23, 2012 in Iguaçu Falls, Brazil. This meeting attracted 4,518 people from 67 countries. This was the first General Session to take place in the IADR Latin American Region.

Those attending the meeting could choose from among 3,227 scientific presentations, including 2,589 poster presentations, 570 oral presentations, 34 Lunch & Learning topics, 27 symposia, six hands-on workshops and one plenary session. Delegates also had the opportunity to visit the exhibit hall, which housed 30 exhibit booths: 19 commercial exhibitions and 11 educational exhibitions.

As the Distinguished Lecturer, Mari Cleide Sogayar (NUCEL-Cell and Molecular Therapy Center, University of São Paulo, Brazil) spoke about “Generation of Cell Lines Overproducing Bone Morphogenetic Proteins and Technology Transfer to a Local Brazilian Pharmaceutical Company.”

Also featured were Group and Network business meetings and receptions, and the presentation of numerous awards and recognitions. Again this year; IADR offered a mobile app for the General Session. During the meeting, Mary MacDougall was installed as the IADR President and she rendered her inaugural address titled “Probing Global Oral Health with a Smile” (J Dent Res 91:1097-1098).
Research Breakthroughs

In 2012, the Journal of Dental Research (JDR) continued to hold the highest Eigenfactor Score of journals published in the “Dentistry, Oral Surgery & Medicine” category, and in that category, the Journal’s Five-Year Scientific Impact Factor (SIF) is 4.102. This information comes from the 2011 Five-Year SIF rankings, published by the Journal Citation Reports (JCR) by Thomson Reuters.

**UNIQUE FISH PATTERNS ASSOCIATED WITH CANCER PROGRESSION OF ORAL DYSPLASIA**

J Dent Res 91:52-57
In this study, high gene gain of CCND1 was associated with an 8-fold elevated risk of progression compared with those with no gain in time-to-progression analysis. Numerical alterations of EGFR and CCND1 and their centromeres might be an effective means for identifying OPLs at risk. Future studies will expand on this analysis and set the stage for application of this approach in routine clinical practice.

**HYPOPLASIA-ASSOCIATED SEVERE EARLY CHILDHOOD CARIES – A PROPOSED DEFINITION**

P.W. Caufield, Y. Li and T.G. Bromage
J Dent Res 91:544-550
This study proposes a new classification of severe early childhood caries (S-ECC) called hypoplasia-associated severe early childhood caries (HAS-ECC). This form of caries affects mostly young children living at or below poverty, characterized by structurally damaged primary teeth that are particularly vulnerable to dental caries.

**ANTI-BIOFILM DENTIN PRIMER WITH QUATERNARY AMMONIUM AND SILVER NANOPARTICLES**

L. Cheng, K. Zhang, M.A.S Melo, M.D. Weir, X. Zhou and H.H.K. Xu
J Dent Res 91:598-604
This study demonstrates that novel quaternary ammonium dimethacrylate and nanoparticles of silver containing primers were strongly antibacterial without compromising dentin bond strength, and hence are promising to inhibit biofilms and secondary caries.

**PREVALENCE OF PERIODONTITIS IN ADULTS IN THE UNITED STATES: 2009 AND 2010**

P.I. Eke, B.A. Dye, L. Wei, G.O. Thornton-Evans and R.J. Genco
J Dent Res 91:914-920
This study estimates the prevalence, severity and extent of periodontitis in the adult U.S. population using data from the 2009 and 2010 National Health and Nutrition Examination Survey (NHANES) cycle. The survey provided direct evidence for a high burden of periodontitis in the adult U.S. population, especially among adults 65 and older.

**DECIDUOUS MOLAR HYPOMINERALIZATION AND MOLAR INCISOR HYPOMINERALIZATION**

M.E.C. Elfrink, J.M. ten Cate, V.W.V. Jaddoe, A. Hofman, H.A. Moll and J.S.J. Veerkamp
J Dent Res 91:551-555
This study focused on the relationship between deciduous molar hypomineralization (DMH) and permanent molar incisor hypomineralization (MIH). The relationship between the occurrence of DMH and MIH suggests a shared cause and indicates that, clinically, DMH can be used as a predictor for MIH.
Scientific Groups and Networks

Through the IADR Scientific Groups & Networks, members are able to collaborate with leading researchers in nearly 30 specialized fields.

Behavioral, Epidemiologic and Health Services Research Group
Cariology Research Group
Clinical and Translational Science Network
Craniofacial Biology Group
Dental Anesthesiology Research Group
Dental Materials Group
Diagnostic Sciences Group
Education Research Group
Evidence-based Dentistry Network
Geriatric Oral Research Group
Global Oral Health Inequalities Research Network
Implantology Group
International RDC/TMD Consortium Network
Microbiology/Immunology Group
Mineralized Tissue Group
Network for Practice-based Research Group
Neuroscience Group
Nutrition Research Group
Oral and Maxillofacial Surgery Group
Oral Health Research Group
Oral Medicine and Pathology Group
Pediatric Oral Health Research Group
Periodontal Research Group
Pharmacology/Therapeutics/Toxicology Group
Prosthodontics Group
Pulp Biology and Regeneration Group
Salivary Research Group
Women in Science Network
Programs

IADR continues to strengthen research efforts and dental research activities in all areas of the world through the Adopt-a-Member Program, the Meeting Dividend Program and the Regional Development Program.

ADOPT-A-MEMBER
The IADR Adopt-a-Member program supported members in 2012, in the following Divisions and Sections: Chinese, Continental European, Ecuadorian, East and Southern African, Indian, Peruvian, and South African. Designed to provide IADR members with the opportunity to support colleagues who did not have the means to become members, the program aims to support oral and dental researchers in developing parts of the world. Colgate-Palmolive Company sponsored 62 members in East and Southern Africa.

MEETING DIVIDEND
Through the Meeting Dividend Program, more than $80,000 was distributed to 25 IADR Divisions, including the American, Argentine, Australia/New Zealand, Brazilian, British, Canadian, Chilean, Chinese, Colombian, Continental European, East and Southern African, Iranian, Irish, Israeli, Japanese, Korean, Kuwaiti, Mexican, Nigerian, Peruvian, Scandinavian, South African, Southeast Asian, Uruguayan and Venezuelan Divisions. Each Division had representation at the IADR General Session & Exhibition in Iguazu Falls, Brazil, and received at least $1,000. The program offers additional funds that can be used at the Divisional level to develop membership and encourage research.

REGIONAL DEVELOPMENT
In 2012, the IADR Regional Development Program (RDP) awarded $28,700 in grants to the following Divisions and Sections:

Australia/New Zealand Division for “Caries prevention, non-surgical preventive caries management, and the dental radiography, Fiji National University School of Oral Health.”

Southeast Asian Division for “Developing Increased Capabilities in Scientific Writing to Enable Publication in International Journals for Dental Scientists in Indonesia, Vietnam, and the Philippines.”

IADR continues to strengthen research efforts and dental research activities in all areas of the world through the Adopt-a-Member Program, the Meeting Dividend Program and the Regional Development Program.
IADR funded and administered $600,000 in the following awards and fellowships in 2012.

**IADR/AADR William J. Gies Awards**

**IADR Academy of Osseointegration Innovation in Implant Sciences Award**

**IADR Colgate Community-Based Research Award for Caries Prevention**

**IADR/Colgate Research in Prevention Travel Awards**

**IADR Cover of the Year, 2011**

**IADR David B. Scott Fellowship**

**IADR Distinguished Scientist Awards**

**IADR Distinguished Service Award**

**IADR E.W. Borrow Memorial Award**

**IADR/GlaxoSmithKline Innovation in Oral Care Awards**

**IADR Heraeus Travel Awards**

**IADR/Lion Dental Research Award**

**IADR Regional Development Program**

**IADR Toshio Nakao Fellowship**

**IADR/Unilever Hatton Competition and Awards**

**IADR Young Investigator Award**

**IADR/GlaxoSmithKline Innovation in Oral Care Awards**

Supported by GlaxoSmithKline

In its ninth year of award support, GSK Consumer Healthcare has contributed more than $2 million to support oral health research. Each of the three 2012 winners received a $75,000 unrestricted research grant, which is funded by GSK Consumer Healthcare and administered by IADR. The 2012 winners were:

- **Simone Duarte**, New York University, USA, and co-investigators Deepak Saxena and Nelson Silva “The Influence of Low-Temperature Plasma on Biofilms”
- **Christopher Irwin**, Queen’s University, Belfast, Ireland, and co-investigators Fionnuala Lundy and Brian Walker “Peptide Mimetics of LL-37 as Novel Therapeutics for Periodontitis”
- **Doron Steinberg**, Hebrew University, Jerusalem, Israel, and co-investigator Michael Friedman “Novel Sustained Release Varnish of Anti-Biofilm/Anti-Quorum-Sensing Agents Against Oral Biofilms”

**IADR/AADR JOURNAL OF DENTAL RESEARCH “COVER OF THE YEAR, 2011”**

This recognition is presented annually for the previous year’s JDR cover image that enhances the impact of the article, and is both scientifically novel and aesthetically pleasing.

The “Cover of the Year, 2011” award was presented to:

**IADR HONORARY MEMBERSHIP**

The three most recent living IADR Past Presidents may select an Honorary Member who has made significant contributions to and/or supports dental research. This year, Honorary Membership was bestowed on former Minister of Health of Brazil José Gomes Temporão, professor and researcher at the Department of Health Administration and Planning of the National School of Public Health at Fiocruz.

**HERAEUS TRAVEL AWARD**

The objective of this travel award, sponsored by Heraeus, is to encourage young investigators to undertake research in new and innovative testing methods of dental materials, and new ideas and approaches to improve and develop dental materials. The recipients of the 2012 Heraeus Travel Awards were:

- **Yoshie Abe**, Western University, Ontario, London, Canada
- **Araceli Acevedo Contreras**, Universidad Nacional Autonoma de Mexico
- **Paula Benetti**, UNESP, SP, Brazil
- **Juliano de Pierr**, UNESP, SP, Brazil
- **Alexander Stepuk**, ETH Zurich, Switzerland
The IADR Board of Directors established this prestigious award to recognize a member who has not served as an IADR Officer but who has performed outstanding service to the Association or distinguished service over a period of time. The 2012 recipient was Prathip Phantumvanit, Thammasat University, Thailand.

IADR Distinguished Scientist Awards
Each of the 16 IADR Distinguished Scientist Awards recognizes a career of distinguished accomplishments in research and development.

Isaac Schour Memorial Award
Supported by an endowment provided by Dr. Bernard G. Samat and Rhoda G. Samat through the Samat Family Foundation
David Kohn, University of Michigan, Ann Arbor, USA

Behavioral, Epidemiologic and Health Services Research Award
Supported by Unilever Oral Care
Anne Nordrehaug Åstrøm, University of Bergen, Norway

Basic Research in Biological Mineralization Award
Supported by Unilever Oral Care
John Bartlett, The Forsyth Institute
Cambridge, Massachusetts, USA

Basic Research in Periodontal Disease Award
Supported by Colgate-Palmolive Company
Denis Kinane, University of Pennsylvania
Philadelphia, USA

Basic Research in Prosthetics and Implants Award
Supported by Astra Tech, Inc.
Pekka Vallittu, University of Turku, Finland

Pharmacology/Therapeutics/Toxicology Research Award
Supported by Wyeth Consumer Healthcare
Jiing-Huei Jeng, National Taiwan University, Taipei

Pulp Biology & Regeneration Award
Supported by L.D. Caulk DENTSPLY International
Jacques Nör; University of Michigan, Ann Arbor, USA

Salivary Research Award
Supported by Wm. Wrigley, Jr. Company
Ammon Peck, University of Florida, Gainesville, USA

Geriatric Oral Research Award
Supported by GlaxoSmithKline
Hideo Miyazaki, Niigata University, Japan

Oral Medicine and Pathology Research Award
Supported by GlaxoSmithKline
Hideo Miyazaki, Niigata University, Japan

Research in Oral Biology Award
Supported by Church & Dwight Company
George Hajishengallis, University of Pennsylvania
Philadelphia, USA

Research in Prosthodontics and Implants Award
Supported by Astra Tech, Inc.
Pekka Vallittu, University of Turku, Finland

Research in Dental Caries Award
Supported by Johnson & Johnson Healthcare Products Division
Eva Söderling, University of Turku, Finland

Research in Dental Caries Award
Supported by Johnson & Johnson Healthcare Products Division
Eva Söderling, University of Turku, Finland

Research in Dental Caries Award
Supported by Johnson & Johnson Healthcare Products Division
Eva Söderling, University of Turku, Finland

IADR/AADR William J. Gies Awards
Supported by J. Morita Corporation
These awards, for the best papers published in the Journal of Dental Research, are presented in three categories: Biological, Biomaterials & Bioengineering and Clinical. The award is named for William J. Gies, the founder of the Journal of Dental Research. Nominations may be made by any person, and the papers to be chosen must describe work which has very significantly advanced knowledge in some aspect of dental research. Papers eligible for consideration are those published during the 12-month period (July-June) immediately preceding the IADR General Session. The award consists of a monetary prize of $1,000 and a plaque. The Gies Award is open to anyone who publishes in the Journal of Dental Research, the official publication of the IADR/AADR.

The award in the Biomaterials & Bioengineering Research category is presented to Lisha Gu et al., for the paper “Biomimetic analogs for collagen biomineralization,” J Dent Res 90:82-7.

The award in the Clinical Research category is presented to Hiroshi Egusa, Osaka University, Japan, for the paper “FGF-2 Stimulates Periodontal Regeneration Results of a Multi-center Randomized Clinical Trial,” J Dent Res 90:35-40.
IADR HAD 12,793 MEMBERS IN 2012, AND ADDED THE FOLLOWING NEW SECTIONS: LEBANESE AND TUNISIAN.
MEMBERSHIP

IADR had 12,793 members in 2012, and added the following new sections: Lebanese and Tunisian.
Regional Report

IADR has 25 Divisions and 17 Sections that comprise five Regions. IADR is organized into Regions for purposes of more effective and efficient delivery of IADR Member Services. Divisions are formed when a nation, or group of geographically related nations, with 50 or more members is approved by Council. Sections can be formed with 10 or more members. All Divisions and Sections are within one of the five Regions. IADR’s organizational structure is best poised to promote research around the world and grow membership.

AFRICA & MIDDLE EAST REGION
(East and Southern African, Kuwaiti, Nigerian and South African Divisions, and Egyptian, Iranian, Iraqi, Jordanian, Lebanese, Saudi Arabian, Sudanese, Syrian, Tunisian and United Arab Emirates Sections)

The Africa & Middle East Region added two non-Divisional Sections: Lebanese and Tunisian. The Lebanese and Tunisian section applications were presented to the IADR Council at the IADR General Session in Iguacu Falls, Brazil. Council approved the formation of the Tunisian and Lebanese non-Divisional Sections.

EAST AND SOUTHERN AFRICAN DIVISION

The East and Southern African Division held a scientific conference in conjunction with the Uganda Dental Association. This meeting, themed “The Changing Trends of Oral Health: Disease Patterns and Management,” took place October 24-26, in Kampala, Uganda. The meeting was aimed at promoting dental research and advances in dentistry.

ASIA/PACIFIC REGION
(Australian/New Zealand, Chinese, Japanese, Korean and Southeast Asian Divisions, and Indian and Mongolian Sections)

AUSTRALIA/NEW ZEALAND DIVISION

The Australia/New Zealand Division was awarded an IADR Regional Development Program grant for research titled “Caries prevention, non-surgical preventive caries management, and the dental radiography. Fiji National University School of Oral Health.”

SOUTHEAST ASIAN DIVISION

The Southeast Asian Division was awarded an IADR Regional Development Program grant for research titled “Developing Increased Capabilities in Scientific Writing to Enable Publication in International Journals for Dental Scientists in Indonesia, Vietnam, and the Philippines.”

INDIAN SECTION

The 25th Conference of the Indian Society for Dental Research (IADR India Section) took place October 5-7, at Bharath University, India, Sree Balaji Dental College. Themed “Probing the Future,” this conference featured opportunities for attendees to network with researchers, dental professionals and key leaders. Innovative research was shared during the conference in more than 200 scientific presentations that included keynote and plenary sessions, oral and poster presentations and more. Areas of integrative dental science and health research presented and discussed at the conference included basic science, clinical trials, lifestyle and prevention, methodology, health services, cost effectiveness and education.

LATIN AMERICAN REGION
(Argentine, Brazilian, Chilean, Colombian, Peruvian, Uruguayan and Venezuelan Divisions, and Costa Rican, Ecuadorian, Panamanian and Paraguayan Sections)

The IADR General Session in Iguacu Falls, Brazil, was the framework of the 5th Meeting of the IADR Latin American Region, which took place June 19. At the meeting, important agreements were achieved to promote and increase professional and student involvement in dental research as well as in IADR activities. Initiatives that were discussed included the Young Investigator Committee, the development of a Facebook page, the virtual guidebook on how to access the IADR website to register or renew memberships, inclusion of information in Spanish and Portuguese on the IADR website to help people join IADR, and the updating of the Regional website. The combined IADR/LAR General Session was the first time that IADR held a General Session in its Latin American Region. The IADR LAR encouraged students and professionals to present their scientific work to seize the opportunity of sharing their research findings with the world. As a result, nearly 3,000 delegates from the LAR attended the meeting.
The International Conference on Novel Anticaries and Remineralizing Agents, took place January 4-6, in Viña del Mar, Chile. The conference was co-supported by faculty from the University of California-San Francisco, USA, School of Dentistry; New York University College of Dentistry, N.Y., USA; the Academic Center for Dentistry, Amsterdam, Netherlands; and the Universidad Finis Terrae Facultad Odontología, Santiago, Chile. The objectives of the conference were to survey (1) the current state of the research available on novel remineralizing agents and antibacterial compounds as related to dental caries; (2) an empirical assessment of what is known about these underused agents said to ameliorate oral health and prevent caries development; (3) methodological critiques of research designs and measurement models on which current knowledge is based; (4) discussion of alternative designs and innovative lines of interdisciplinary research that may promise to help us know more; and (5) critical issues of the data needs for the future. The proceedings were published in the September issue of the IADR/AADR Advances in Dental Research, an e-supplement to the Journal of Dental Research.

The 36th Annual Meeting of the Canadian Association for Dental Research, held in conjunction with the 41st Annual Meeting & Exhibition of the American Association for Dental Research, took place in Tampa, Florida, USA, March 21-24, 2012. The Distinguished Lecture Series speakers were: John S. Greenspan, University of California, San Francisco, USA, speaking on “HIV/AIDS: The Task Continues”; Martha J. Somerman, National Institute of Dental and Craniofacial Research, Bethesda, Md., USA, speaking on “Personalized Health Care: Opportunities and Challenges for Dentistry”; and Anthony J. Atala, Wake Forest University Institute for Regenerative Medicine, Winston-Salem, N.C., USA, speaking on “Regenerative Medicine and Organ Replacement Therapy.”

The IADR Pan European Region (PER) Congress & Exhibition took place September 12-15, in Helsinki, Finland. More than 1,000 scientists and representatives of the industry convened at the Congress to collaborate and learn cutting-edge research. This was the first official IADR Pan European Region meeting fully organized in part by the IADR Global Headquarters. As an important event in European oral, dental and craniofacial research, the PER/IADR Congress provided attendees with information on recent research developments and breakthroughs, and current and future trends. While attending the PER/IADR Congress, delegates had the opportunity to choose from among nearly 800 scientific presentations and visit 22 exhibit booths to meet with industry leaders. In addition, the meeting featured several top scientific symposia and workshops.

- 52% Meeting
Future Initiatives

**IADR TO PUBLISH TWO SPECIAL JDR SUPPLEMENTS**

Due to the incredibly enthusiastic response to the 2012 *Journal of Dental Research* clinical supplement, the JDR is excited to announce the publication of another supplement in 2013 encompassing all areas of clinical research in the dental, oral and craniofacial sciences. In addition to the clinical supplement, in 2013 the JDR will also publish supplement focused on oral implantology.

**FUTURE MEETINGS**

**2013**  The 91st General Session & Exhibition of the IADR will be held in conjunction with the 42nd Annual Meeting of the AADR and 37th Annual Meeting of the CADR, March 20-24, in Seattle, Washington, USA.

The World Congress on Preventive Dentistry will take place October 9-12, in Budapest, Hungary.

**2014**  The 92nd General Session & Exhibition of the IADR will be held June 25-28, in Cape Town, South Africa.

**2015**  The 93rd General Session & Exhibition of the IADR, held in conjunction with the 44th Annual Meeting the AADR and the 39th Annual Meeting of the CADR, March 11-14, in Boston, Massachusetts, USA.

**2016**  The 94th General Session & Exhibition of the IADR, held in conjunction with the 3rd IADR Asia Pacific Regional Meeting and the Annual Meeting of the IADR Korean Division, June 22-25, in Seoul, South Korea.
