The International Association for Dental Research (IADR), headquartered in Alexandria, Va., USA, is a nonprofit organization with nearly 11,000 members worldwide. Its mission is: (1) to advance research and increase knowledge for the improvement of oral health worldwide; (2) to support and represent the oral health research community; and (3) to facilitate the communication and application of research findings.

This year, the Journal of Dental Research increased its Five-Year Scientific Impact Factor to 4.433.

IADR/AADR published a clinical supplement to the JDR that encompassed the complete spectrum of oral, dental and craniofacial investigation with a focus on clinical and translational research.

The 92nd General Session & Exhibition of the IADR in Cape Town, South Africa, was the first IADR General Session held on the African continent.

IADR expanded its membership categories to include Affiliate Membership, which is for individuals who are not primarily involved in research but have an interest in it.

In 2014, IADR implemented the IADR Unilever Social Entrepreneur Approach to Change Oral Health Behavior Research Award.

MESSAGE FROM THE PRESIDENT

It is an honor to serve as the president of the International Association for Dental Research. As the pre-eminent voice for dental, oral and craniofacial research, IADR’s mission is to advance research and improve knowledge for the improvement of oral health worldwide, to support and represent the oral health research community, and to facilitate the communication and application of research findings.

As IADR continues to serve the needs of the dental, oral and craniofacial research community, we are expanding our reach to also serve the needs of clinicians who have an interest in research. Working toward this goal, this year IADR launched its Affiliate Membership category, which is designed especially for clinicians, advocates and educators. This new membership category was created for people who are not primarily involved in research but have an interest in keeping up with the latest research, including practicing healthcare professionals, dental professionals involved in practice-based research networks or evidence-based dentistry, patient advocates or healthcare educators with primary teaching responsibility.

As a multidisciplinary organization, IADR serves a diverse population of researchers, educators and clinicians. To expand its membership benefits, IADR with the American Association for Dental Research (AADR) made access to the Knowledge Community a membership benefit. The Knowledge Community houses recordings of cutting-edge presentations from IADR and AADR meetings, and at the conclusion of each recorded session a brief quiz may be completed for ADA CERP credit. This new benefit will further enhance the overall membership experience and allow for increased opportunities for IADR members to earn continuing education credits.

Opportunities to apply for IADR Awards and Fellowships are also an important membership benefit. This year, IADR implemented the IADR Unilever Social Entrepreneur Approach to Change Oral Health Behavior Research Award. This new award stimulates scientific research in social entrepreneur approaches to affect real behavioral change at the individual or community level that improve oral health, with a particular emphasis on interventions targeted to disadvantaged and vulnerable populations.

This has been an exciting year for IADR as it grew its Awards and Fellowships program and enhanced the membership benefits, among other accomplishments. As you read this Annual Report you will also learn about some of the future developments that you can expect for 2015. I hope that all IADR members will remain engaged in the Association as we continue to enhance the membership and professional development experiences.
MESSAGE FROM
THE EXECUTIVE DIRECTOR

Under the leadership of President Yoshimitsu Abiko and an outstanding Board of Directors, the International Association for Dental Research (IADR) had another successful year of accomplishments in achieving our Mission.

The 92nd General Session & Exhibition of the IADR was a historic occasion because it was the first time the IADR General Session was held on the African continent. This meeting took place June 25-28, 2014, in Cape Town, South Africa, and it was held in conjunction with the Africa/Middle East Regional Meeting. The meeting attracted nearly 2,400 people from 79 countries. Those attending the meeting could choose from among 1,541 scientific presentations. Delegates also had the opportunity to visit the exhibit hall, which housed 30 exhibit booths: 13 corporate and 17 institutional/government/nonprofits. Prior to the meeting, the Second IADR Academy was held on Monday, June 23, 2014, in Cape Town, South Africa. The Second IADR Academy was created to encourage and promote good dental research internationally.

While in Cape Town, IADR members took advantage of the opportunity to volunteer with the Dental Wellness Trust, a UK charity, which arranged for members to visit the surrounding townships where an oral health toothbrushing research project is ongoing. The volunteers screened nearly 280 children who attended Africa Tikkun School. Through their participation in this program, the IADR members worked toward IADR’s mission of improving oral health worldwide.

I am pleased to report that the Journal of Dental Research (JDR) continues to publish high-caliber research and is the number one journal in the “Dentistry, Oral Surgery & Medicine” category as measured by the Eigenfactor Score. The JDR also has a Scientific Impact Factor (SIF) of 4.144 according to the 2014 SIF rankings released by the Journal Citation Reports (JCR) in July. To highlight clinical and translational research, the JDR continues to publish clinical supplements with one in July 2014, following two clinical supplements in 2013 and one in 2012. There was one issue of Advances in Dental Research in 2014 — which was the proceedings of The Oral Microbiome, Immunity, and Chronic Disease Symposium: 50th Anniversary of the University at Buffalo Oral Biology Graduate Program. The December issue of JDR was a special themed issue centered on novel dental biomaterials and technologies. Although IADR/AADR have published clinical supplements to the JDR, this was the first special themed issue the Associations have published.

In the JDR vein, something to look forward to next year is the publication of a special issue in the fall that will highlight the latest developments in the field of craniofacial stem cells. The issue will be of interest to all oral health researchers and practitioners.

As IADR works to better serve its members in 2015, I am excited to announce that membership in an IADR Scientific Group or Network will become a membership benefit. IADR Scientific Groups and Networks are the backbone of the Association and participation affords members the opportunity to engage with prominent researchers around the globe, which will further enhance their overall membership experience.

With the strength of our members, IADR was able to achieve many accomplishments this year and we rely on our members to help us work toward the mission of advancing research and increasing knowledge for the improvement of oral health worldwide.

I thank the members for their continued support, and IADR President Yoshimitsu Abiko and the entire IADR Board of Directors who work tirelessly to support the mission of the Association.
HIGHLIGHTS

IADR Holds its General Session on the African Continent for the First Time
The 92nd General Session & Exhibition of the IADR in Cape Town, South Africa, was the first IADR General Session held on the African continent. The meeting was held in conjunction with the Africa/Middle East Regional Meeting, June 25–28, 2014.

Journal of Dental Research Continues to Hold #1 Eigenfactor Score in its Category
The Journal of Dental Research continues to hold the #1 Eigenfactor Score in its category according to the 2014 Scientific Impact Factor rankings, released in 2014, published by the Journal Citation Reports. At 0.02235 the JDR holds the highest Eigenfactor Score of journals published in the “Dentistry, Oral Surgery & Medicine” category. In the Dentistry, Oral Surgery & Medicine category, the Journal ranked #1 in Article Influence of the 82 journals in this category.

IADR/AADR Publish Fourth Clinical Supplement to the Journal of Dental Research
This year, IADR and AADR released the fourth clinical supplement to the Journal of Dental Research (JDR). This issue encompasses the complete spectrum of oral, dental and craniofacial investigation with a focus on clinical and translational research. In the fourth clinical supplement since 2012, the JDR is extending its tradition to publish cutting-edge advances in oral health research with ramifications to the clinical practice setting and the clinical community.

IADR Expands its Membership Categories to Include Affiliate Membership
This year IADR expanded its membership offerings to include an Affiliate Membership category for individuals who are not primarily involved in research but have an interest in keeping up with the latest research. This new membership category is a great way for clinicians and practicing healthcare professionals, dental professionals involved in PBRNs or evidence-based dentistry, patient advocates or healthcare educators with primary teaching responsibility to become involved in IADR.

IADR Partners with Unilever to Launch Award
In 2014, the IADR Unilever Social Entrepreneur Approach to Change Oral Health Behavior Research Award was launched. The purpose of this award is to stimulate scientific research in social entrepreneur approaches to affect real behavioral change at the individual or community level that improve oral health, with a particular emphasis on interventions targeted to disadvantaged and vulnerable populations. This award is supported by an unrestricted educational grant from Unilever. This first award was presented to Finbarr Allen of University College Cork, Ireland.
FDI
FDI President Tin Chun Wong attended the IADR General Session in Cape Town and addressed the IADR Council. Wong outlined the following FDI initiatives:

Vision 2020, the 2nd Edition of the Oral Health Atlas, the FDI’s involvement in the Minamata Convention and the FDI Data Hub for Global Oral Health. IADR Past President John Clarkson represents IADR on the FDI Science Committee and he was able to attend the India meeting. The FDI meeting in India was highly successful with over 17,000 delegates. The FDI governing body adopted a new Strategic Plan, launched the FDI Data Hub for Global Oral Health, adopted a new policy statement on water fluoridation, and discussed implementation of the Minamata Convention. In October, the FDI announced the appointment of IADR member Ira Lamster as the International Dental Journal editor.

International Organization for Standardization (ISO)
IADR has a “liaison membership” to ISO/TC 106—Dentistry. The 2014 ISO/TC 106—Dentistry meeting was in Berlin, Germany in September 2014. At that meeting IADR member Ken Anusavice was elected as the next Chair of ISO TC-106, succeeding Derek Jones, also an IADR member.

World Health Organization
IADR is one of two oral health NGOs to the WHO (the other being the FDI). This year, IADR submitted its IADR-WHO Collaboration Plan for 2015-2017. This is required for IADR to maintain its status with the WHO. The broad areas of collaboration include: increase scientific research and collaboration into alternative dental restorations, reduction in the global burden of oral diseases and conditions, reduction in the global burden of oral diseases and conditions, reduction in risk factors related to oral cancer, reduction of oral diseases and conditions as co-morbidities to NCD’s and as potential risk factors for NCD’s, and increased attention to diet and nutrition and oral health in oral health workforce curricula. The WHO confirmed that IADR member Hiroshi Ogawa from Japan was seconded to work with the WHO Global Oral Health Programme as of April 16, 2014. Ogawa has been working with the WHO since 2003 in different capacities.

United Nations Environment Programme
IADR is a member of the United Nations Environment Programme (UNEP) Global Mercury Partnership (GMP). The goal of the UNEP GMP is to protect human health and the global environment from the release of mercury and its compounds by minimizing and, where feasible, ultimately eliminating global, anthropogenic mercury releases to air, water and land. Last year, the Minamata Convention on Mercury was signed and IADR President Yoshimitsu Abiko attended the signing ceremony in Kumamoto, Japan. As of November 2014, 128 countries have signed the treaty and nine countries have ratified the treaty. The Minamata Convention contains provisions for the phase down (as opposed to a phase-out or ban) of dental amalgam and calls on countries to increase dental prevention, thereby eliminating the need for any dental restoration, increased research into alternative dental restoratives, and best management practices for handling amalgam waste. The December 2014 special-themed issue of the JDR on novel materials is also advancing this objective and will be valuable for governments, industry and other funders in identifying research priorities to meet these provisions of promoting research and development of quality mercury-free materials for dental restorations.
The 92nd General Session & Exhibition of the International Association for Dental Research took place June 25–28, 2014, in Cape Town, South Africa. This meeting, held in conjunction with the Africa/Middle East Regional Meeting, was the first IADR General Session to take place on the African continent.

Nearly 2,400 people from 79 countries attended the 2014 IADR/AMER General Session & Exhibition.

Building upon the success of last year's IADR Meet-a-Mentor Luncheon, IADR/AMER held a Meet-a-Mentor Luncheon this year for student attendees. This session was designed to enhance the learning experience for students. Senior scientists, who were also past recipients of the IADR Distinguished Scientist Award and/or past mentor awardees, led motivational and realistic discussions about the paths they took during their academic careers.

The Distinguished Lecture Series speakers were Helena Cronin, University of London, The London School of Economics and Political Science, UK, speaking on “Sex at Work: The Truth About Male-Female Differences”; Arturo Zychlinsky, The Max Planck Institute for Infection Biology, Berlin, Germany, speaking on “NETs—From Infection to Autoimmunity”; and Usuf M. E. Chikte, Stellenbosch University, Tygerberg, South Africa, speaking on “Overcoming the Disciplinary Divides: Tackling Complexity With a Transdisciplinary Prism.” Also featured were Group business meetings and receptions, and the presentation of numerous awards and recognitions.

The 2nd IADR Academy took place on June 23, 2014, prior to the IADR/AMER General Session in Cape Town, South Africa. The 2nd IADR Academy was created to encourage and promote good dental research internationally. This year, the program featured leaders in the field of research speaking on important topics including clinical research methods, planning and evaluating oral health trials, Cochrane Collaboration reviews, evidence-based dentistry and ethics in research.

A pre-conference workshop themed “Oral Health Inequalities in Africa and the Middle-East Region (AMER)” was held on June 24. This pre-conference workshop prepared a suitable situation analysis of the inequalities related to oral health in AMER by forming task groups for the different areas suggested by the IADR Global Oral Health Inequalities Research Network.

Prior to the IADR/AMER General Session, the Dental Wellness Trust, a UK charity arranged for IADR members with interest to visit a surrounding township where an oral health toothbrushing research project is ongoing. IADR members are involved in the research study.

At the conclusion of the meeting during the Closing Ceremony and Presidential Induction, Yoshimitsu Abiko was installed as the 91st IADR president. During the ceremony he gave his inaugural address titled “Expanding Our Reach” (J Dent Res 92: 937).
Rare Bone Diseases and Their Dental, Oral, and Craniofacial Manifestations
J Dent Res 93: 75-195
Hereditary diseases affecting the skeleton are heterogeneous in etiology and severity. Though many of these conditions are individually rare, the total number of people affected is great. These disorders often include dental-oral-craniofacial (DOC) manifestations, but the combination of the rarity and lack of in-depth reporting often limit our understanding and ability to diagnose and treat affected individuals. In this insightful and thorough review, researchers the researchers aimed to improve the identification of genetic, molecular, and/or biologic causes, diagnoses, and treatment of these and other rare bone conditions that may share underlying mechanisms of disease.

Projections of U.S. Edentulism Prevalence Following Five Decades of Decline
G.D. Slade, A.A. Akinkugbe and A.E. Sanders
J Dent Res 93: 959-965
After decades of decline in prevalence of complete tooth loss (edentulism), the trend continues to be misinterpreted, producing flawed projections and misdirected health goals. The researchers of this study investigated population trends in edentulism among U.S. adults at least 15 years of age by creating time-series data from five national cross-sectional health surveys. Geographic and sociodemographic variation in prevalence was investigated using a sixth U.S. survey of 432,519 adults conducted in 2010. With the passing of generations born in the mid-20th century, the rate of decline in edentulism is projected to slow, reaching 2.6% by 2050.

SSRIs and the Risk of Osseointegrated Implant Failure – A Cohort Study
X. Wu, K. Al-Abedalla, E. Rastikerdar, S. Abi Nader, N.G. Daniel, B. Nicolau and F. Tamimi
J Dent Res 93: 1054-1061
Selective Serotonin Reuptake Inhibitors (SSRIs), the most widely used drugs for the treatment of depression, have been reported to reduce bone formation and increase the risk of bone fracture. Since osseointegration is influenced by bone metabolism, this study investigates the association between SSRIs and the risk of failures in osseointegrated implants. The findings indicate that treatment with SSRIs is associated with an increased failure risk of osseointegrated implants, which might suggest a careful surgical treatment planning for SSRI users.

Global Burden of Periodontitis: A Systematic Review and Meta-Regression
N.J. Kassebaum, E. Bernabé, M. Dahiya, B. Bhandari, C.J.L. Murray and W. Marcenes
J Dent Res 93: 1045-1053
The purpose of this study was to consolidate all epidemiological data about severe periodontitis and subsequently to generate internally consistent prevalence and incidence estimates for all countries, 20 age groups, and both sexes for 1990 and 2010. From the systematic search, a total of 72 qualifying studies involving 291,170 individuals aged 15 years or older from 37 countries were included in the meta-regression using model- ing resources of the Global Burden of Disease (GBD) 2010 Study. In 2010, severe periodontitis was the sixth most prevalent condition in the world affecting 743 million people worldwide. In this study, there were considerable variations in prevalence and incidence between regions and countries. These findings underscore the enormous public health challenge posed by severe periodontitis and are a microcosm of the epidemiologic transition to non-communicable diseases occurring in many countries.

Acute Myocardial Infarct Size is Related to Periodontitis Extent and Severity
J Dent Res 93: 993-998
Cardiovascular disease has been associated with 40% of deaths in high-income countries and 28% in lower-income countries. The relationship between periodontitis and acute myocardial infarction is well documented, but it has not been established whether the extent and severity of periodontitis influence the infarct size. This cross-sectional and analytic study was designed to investigate the association of chronic periodontitis extent and severity with acute myocardial infarct size as indicated by serum cardiac troponin I and myoglobin levels. This study contributes the first research data demonstrating that the extent and severity of periodontitis is positively associated with acute myocardial infarct size as measured by serum troponin I and myoglobin levels.
Through the IADR Scientific Groups & Networks, members are able to collaborate with leading researchers in 30 specialized fields.

Behavioral, Epidemiologic and Health Services Research Group
Cariology Research Group
Clinical and Translational Science Network
Craniofacial Biology Group
Dental Anesthesiology Research Group
Dental Materials Group
Diagnostic Sciences Group
Education Research Group
Evidence-based Dentistry Network
Geriatric Oral Research Group
Global Oral Health Inequalities Research Network
Implantology Group
International RDC/TMD Consortium Network
Microbiology/Immunology Group

Mineralized Tissue Group
Network for Practice-based Research Group
Neuroscience Group
Nutrition Research Group
Oral and Maxillofacial Surgery Group
Oral Health Research Group
Oral Medicine and Pathology Group
Pediatric Oral Health Research Group
Periodontal Research Group
Pharmacology/Therapeutics/Toxicology Group
Prosthodontics Group
Pulp Biology and Regeneration Group
Salivary Research Group
Stem Cell Biology
Student Training and Research (STAR)
Women in Science Network
IADR continues to strengthen research efforts and dental research activities in all areas of the world through the Adopt-a-Member Program, the Meeting Dividend Program and the Regional Development Program.

**Adopt-a-member**

The 2014 Adopt-a-member program supported 97 members from the following Divisions and Sections: Chinese, Continental European, East and Southern African, Iranian, South African and Sudanese. Designed to provide IADR members with the opportunity to support colleagues who did not have the means to become members, the program aims to support oral and dental researchers in developing parts of the world. Colgate-Palmolive Company sponsored 79 members in East and Southern Africa.

**Meeting Dividend**

This year, $73,275 was distributed to 25 IADR Divisions including the American, Argentine, Australian/New Zealand, Brazilian, British, Canadian, Chilean, Chinese, Colombian, Continental European, East and Southern African, Indian, Iranian, Iraqi, Irish, Israeli, Japanese, Korean, Kuwaiti, Mexican, Nigerian, Peruvian, Scandinavian, South African and Southeast Asian Divisions. Each Division had representation at the IADR/AADR/CADR General Session & Exhibition in Seattle, Washington, USA, and received at least $1,000. The program offers additional funds that can be used at the Divisional level to develop membership and encourage research.

**Regional Development**

In 2014, the IADR Regional Development Program (RDP) awarded $66,300 in grants to the following Regions and Divisions:

- **Africa Middle East Region** for “The Pre-Conference Workshop “Oral Health Inequalities in Africa and the Middle-East Region (AMER).”
- **Mexican Division** for “Establishment of Mexico’s Research Network for Oral Cancer Control.”
- **Latin American Region** for “A Multicenter Program for Oral Cancer Prevention in the Latin American Region of the IADR.”
AWARDS

IADR funded and administered $738,684 in the following awards and fellowships in 2014:
- IADR/AADR Cover of the Year
- IADR/AADR William J. Gies Awards
- IADR Academy of Osseointegration Innovation in Implant Sciences Award
- IADR Colgate Research in Prevention Travel Awards
- IADR David B. Scott Fellowship
- IADR Distinguished Service Award
- IADR Distinguished Scientist Awards
- IADR E.W. Borrow Memorial Award
- IADR Heraeus Kulzer Travel Awards
- IADR Honorary Membership
- IADR Innovation in Oral Care Awards
- IADR Lion Dental Research Award
- IADR Norton Ross Fellowship
- IADR Regional Development Program
- IADR Unilever Hatton Competition and Awards
- IADR Unilever Social Entrepreneur Approach to Change Oral Health Behavior Research Award
- IADR Young Investigator Award

IADR Unilever Social Entrepreneur Approach to Change Oral Health Behavior Research Award

This was the first year of this award whose purpose is to stimulate scientific research in social entrepreneur approaches to affect real behavioral change at the individual or community level that improve oral health, with a particular emphasis on interventions targeted to disadvantaged and vulnerable populations. This award is supported by an unrestricted educational grant from Unilever. This first award was presented to Finbarr Allen of University College Cork, Ireland.

IADR Innovation in Oral Care Awards

Sponsored by GlaxoSmithKline, these awards were designed to inspire innovation and novel research in oral care and to offer opportunities for investigators to conduct research into the development of innovative and novel compounds, biomaterials or devices with a direct impact on the quality of life of the public. The three prestigious awards recognize research in innovative oral care technologies that may maintain and improve oral health and the quality of life. In this, the 11th year of the awards, which are in the form of unrestricted research grants, the recipients each received $75,000. The 2014 recipients were:

- Jake Jinkun Chen, Tufts University, Boston, Mass., USA and co-authors Qisheng Tu and Lily Dong, University of Texas Health Science Center at San Antonio, USA
- A New Therapy for Treating Diabetic Periodontitis

- Yvonne Kapila, University of Michigan, Ann Arbor, USA and co-authors J. Christopher Fenno and Alexander Rickard
- The Effect of Nisin on Dental Plaque Biofilm Communities

- Keith L. Kirkwood, Medical University of South Carolina, Charleston, USA and co-author Frank Alexis, Clemson University, South Carolina, USA
- Novel Anti-Inflammatory Nanoparticle Scaffolds for Periodontal Treatment

IADR/AADR Journal of Dental Research “Cover of the Year, 2013”

This recognition is presented annually for the previous year’s JDR cover image that enhances the impact of the article, and is both scientifically novel and aesthetically pleasing. The “Cover of the Year, 2013” award was presented to: H. Ikeda and H. Suda for the paper “Odontoblastic Syncytium through Electrical Coupling in the Human Dental Pulp,” J Dent Res 92: 371-375.

IADR Colgate Research in Prevention Travel Awards

Sponsored by Colgate-Palmolive, Co., these travel awards were established to support students and young investigators doing research in the area of oral disease prevention. The award was given this year to five individuals, with a monetary award of $2,000 each.

- Omer Deutsch —The Hebrew University, Jerusalem, Israel
- Duangporn Dongthip —The University of Hong Kong, SAR, China
- Jackeline Gallo do Amaral —Araçatuba Dental School, UNESP, Brazil
- Rui Li —The University of Hong Kong, SAR, China
- Thatsanees Saladayanant —University of North Carolina at Chapel Hill, USA

IADR Heraeus Kulzer Travel Award

Sponsored by Heraeus Kulzer, the objective of this award program is to encourage young investigators to undertake research in new and innovative testing methods of dental materials, and new ideas and approaches to improve and develop dental materials. This year’s recipients were:

- Anas Faraj Aljabo, University College London, England, UK
- Jamila Mohamed Almuhamed, Barts and The London School of Medicine and Dentistry, England, UK
- Olivia A. Osiro, University of Nairobi, Kenya
- Taneke Taylor-Jones, University of Illinois at Chicago, USA
- Jiajun Zhu, The University of Hong Kong, SAR, China

IADR Honorary Membership

The three most recent living IADR Past Presidents who are no longer serving on the Board may select an Honorary Member who has made significant contributions to and/or supports dental research. This year, Honorary Membership was bestowed on Johan Smit, chief dental officer of South Africa, Department of Health, Pretoria.

IADR Lion Dental Research Award for Junior Investigators

Sponsored by Lion, this award is intended to support improvements in oral health sciences through the stimulation of junior investigators by: (1) recognition of outstanding and innovative research in basic dental science for the improvement of public dental health; and (2) recognition of applied research achievements for the improvement and development of oral care products for the prevention of oral diseases. The monetary award is $2,000 each, and the 2014 award recipients were:

- Oral Health Research: Donwiwat Saensom, Khon Kaen University, Thailand
- Salivary Research: Omer Deutsch, The Hebrew University, Jerusalem, Israel

IADR David B. Scott Fellowship

Presented to Sungkyyoon Kang, Wonkwang University, Republic of Korea, representing the Korean Division, this Fellowship is supported by the proceeds of an endowment created by the late Mrs. Nancy M. Scott in honor of her husband, David B. Scott, a past president of the IADR. The Fellowship consists of funding in the amount of $2,500.

IADR Distinguished Service Award

The IADR Board of Directors established this prestigious award to recognize a member who has not served as an IADR Officer, but who has performed outstanding service to
the Association or distinguished service over a period of time. Two recipients were selected this year: Eino Honkala of Kuwait University and Francois de Wet of University of Pretoria, South Africa.

IADR Norton M. Ross Fellowship
Presented to Yaoting Ji. Wuhan University, China, representing the Chinese Division, this Fellowship honors the late Dr. Norton M. Ross, a dentist and pharmacologist, who made significant contributions to the fields of oral medicine and dental clinical research, creating a major impact on the public’s oral health. The Fellows consists of funding in the amount of $2,800.

IADR Distinguished Scientist Awards
Each of the 16 IADR Distinguished Scientist Awards recognizes a career of distinguished accomplishments in research and development.

Isaac Schour Memorial Award
Sponsored by an endowment provided by Dr. Bernard G. Sarnat and Rhoda G. Sarnat through the Sarnat Family Foundation

John Jansen, Radboud University Nijmegen Medical Center, The Netherlands

Behavioral, Epidemiologic and Health Services Research Award
Sponsored by Unilever Oral Care

Richard Watt, University College London, England, UK

Basic Research in Biological Mineralization Award
Sponsored by Unilever Oral Care

John Timothy Wright, The University of North Carolina at Chapel Hill, USA

Craniofacial Biology Research Award
Sponsored by DENTSPLY International

Jill Dixon, The University of Manchester, England, UK

H. Trendley Dean Memorial Award
Sponsored by Colgate-Palmolive, Co.

Marilia Buzalaf, University of São Paulo, Brazil

Research in Dental Caries Award
Sponsored by Johnson & Johnson

Israel Kleinberg, Stony Brook University, New York, USA

Oral Medicine & Pathology Research Award
Sponsored by Unilever Oral Care

Saman Warnakulasuriya, King’s College London, England, UK

Geriatric Oral Research Award
Sponsored by GlaxoSmithKline

William Murray Thomson, University of Otago, Dunedin, New Zealand

Research in Oral Biology Award
Sponsored by Church & Dwight

Floyd Dewhirst, The Forsyth Institute, Cambridge, Massachusetts, USA

Basic Research in Periodontal Disease Award
Sponsored by Colgate-Palmolive, Co.

Dana Graves, University of Pennsylvania, Philadelphia, USA

Pharmacology/Therapeutics/Toxicology Research Award
Sponsored by IADR

Frederick Curro, New York University, USA

Research in Prosthodontics and Implants Award
Sponsored by DENTSPLY Implants

Takahiro Ogawa, University of California, Los Angeles

Pulp Biology & Regeneration Award
Sponsored by L.D. Caulk DENTSPLY

Misako Nakashima, National Institute for Longevity Sciences, Aichi, Japan

Salivary Research Award
Sponsored by Wm. Wrigley Jr. Company

Indu Ambudkar, NIH, NIDCR, Bethesda, Maryland, USA

Wilmer Souder Award
Sponsored by an endowment provided by the IADR Dental Materials Group

Susanne Scherrer, University of Geneva, Switzerland

Young Investigator Award
Sponsored by Crest Oral-B, P&G Professional Oral Health

Dean Ho, University of California, Los Angeles, USA

IADR/AADR William J. Gies Award
These awards, for the best papers published in the Journal of Dental Research, are presented in three categories: Biological, Biomaterials & Bioengineering, and Clinical. The award is named for William J. Gies, the founder of the Journal of Dental Research. Nominations may be made by any person, and the papers to be chosen must describe work which has very significantly advanced knowledge in some aspect of dental research. Papers eligible for consideration are those published during the 12-month period (July–June) immediately preceding the IADR/AADR General Session. The award consists of a monetary award of $1,000 and a plaque. The Gies Award is open to anyone who publishes in the Journal of Dental Research, the official publication of the IADR/AADR.

The award in the Biological Research category was presented to Richard P. Darveau, George Hajishengallis and Michael A. Curtis for the paper, “Porphyromonas gingivalis as a Potential Community Activist for Disease,” J Dent Res. 91: 816-820.

Then IADR President Helen Whelton presents the IADR E.W. Borrow Memorial Award to Anne Maguire.

IADR E.W. Borrow Memorial Award
Presented to Anne Maguire, of Newcastle University, Newcastle Upon Tyne, UK, this award recognizes and stimulates research in oral health prevention for children, with a priority for caries prevention using fluoride in different formats. This is the 23rd year of this award. The award consists of a plaque and a monetary award of $3,500.

IADR Academy of Osseointegration Innovation in Implant Sciences Award
This is the fourth year of this award. The award is intended to help investigators pursue innovative and novel research in oral care that involves, but is not limited to, dental implant therapy. One competitive award of up to $75,000 is provided to recipients. The award was given this year to Rene Olivares-Navarette, Virginia Commonwealth University, Richmond, Virginia, USA.
IADR had 10,833 Members in 2014.
REGIONAL REPORTS

IADR has 28 Divisions and 15 Sections that comprise five Regions. IADR is organized into Regions for purposes of more effective and efficient delivery of IADR Member Services. Divisions are formed when a nation, or group of geographically related nations, with 50 or more members is approved by Council. Sections can be formed with 10 or more members. All Divisions and Sections are within one of the five Regions. IADR’s organizational structure is best poised to promote research around the world and grow membership.

Africa & Middle East Region
(Iranian, Iraqi, Kuwaiti, Nigerian, Saudi Arabian and South African Divisions, and Egyptian, Jordanian, Lebanese, Sudanese, Syrian, Tunisian and United Arab Emirates Sections)

The Africa/Middle East Regional Meeting took place June 25–28, 2014, in Cape Town, South Africa. This meeting was held in conjunction with the 92nd General Session & Exhibition of the International Association for Dental Research, which was the first IADR General Session to take place on the African continent. The meeting attracted nearly 2,400 people from 79 countries, including nearly 400 attendees from the Africa/Middle East Region. Those attending the meeting could choose from among 1,541 scientific presentations, including 1,131 posters, 356 oral presentations, 20 Lunch & Learning topics, 23 symposia, 4 hands-on workshops and three plenary sessions. Delegates also had the opportunity to visit the exhibit hall, which housed 30 exhibit booths: 13 corporate and 17 institutional/government/nonprofits.

Asia/Pacific Region
(Australian/New Zealand, Chinese, Indian, Japanese, Korean and Southeast Asian Divisions, and Mongolian and Pakistani Sections)

AUSTRALIAN & NEW ZEALAND DIVISION
The 54th Annual Scientific Meeting of the IADR Australian & New Zealand Division took place September 29–October 1, 2014, in Brisbane, Australia. The plenary sessions and symposia were built around the meeting’s theme: “Inequalities to Personalized Medicine: A Tale of Disparities.” Two of the speakers included IADR President Yoshimitsu Abiko, who delivered a plenary address about personalized medicine; and IADR Immediate Past President Helen Wheeldon who spoke about the IADR-Global Oral Health Inequalities Research Agenda® and fluoride research. The meeting also provided an opportunity for posters to be presented, with allowed for the further scientific exchanges.

SOUTHEAST ASIAN DIVISION
The 28th Annual Scientific Meeting of the IADR Southeast Asia Division was held in conjunction with the 25th Annual Scientific Meeting of the South East Asian Association for Dental Education, August 11–14, 2014, in Kuching, Sarawak, Malaysia. These meetings offered thought-provoking and stimulating scientific programs. In addition, the meetings brought together academics and researchers with shared interests in dental disciplines, and oral and craniofacial research through keynote addresses, research competitions, symposia, and oral and poster presentations. Opportunities were also present for attendees to meet face-to-face with global experts and establish new collaborations.

Latin American Region
(Argentine, Brazilian, Chilean, Colombian, Peruvian, Uruguayan and Venezuelan Divisions, and Caribbean, Costa Rican, Ecuadorian, Panamanian and Paraguayan Sections)

URUGUAYAN DIVISION
The 9th Meeting of the IADR Uruguayan Division was held in Montevideo on August 8–9, 2014. There were 170 attendees from Argentina, Brazil, Chile, Paraguay and Uruguay. The program was composed of 47 abstracts as oral presentations, a poster session and analysis of projects. There were also three keynote lectures: Mariela Mautone speaking on research ethics, Laura Cosetti speaking about 2014 Hatton work and Hector Lanfranchi speaking about the 2013 regional development project. Others attending the meeting included IADR Latin American Region (LAR) Vice President Erik Dreyer, IADR Past President Maria Fidela de Lima Navarro, LAR Past President Sigmar de Melo Rode, LAR Past President Hector Lanfranchi, IADR Argentine Division President Mariana Picca and IADR Paraguayan Section President Maria Teresa Chirife.

PERUVIAN DIVISION
The IADR Peruvian Division Annual Meeting, took place August 5–6, 2014, in San Isidro and San Borja, Peru. August 5 allowed for a pre-congress that was themed “Fundamentals and Applications of Acupuncture.” The theme of the August 6 portion of the meeting was “Alternative Medicine Applications of Dentistry.” The keynote speaker was Rosario de la Torre, who is a doctor specializing in dental acupuncture and orofacial pain.
North American Region
(American, Canadian and Mexican Divisions)

AMERICAN ASSOCIATION FOR DENTAL RESEARCH
The 7th AADR Fall Focused Symposium: Research Translated Into Practice took place October 7-8, 2014. Organized under the leadership of AADR President Timothy DeRouen, this two-day symposium preceded the ADA 2014—America’s Dental Meeting, in San Antonio, Texas, USA. At the meeting, scientific experts explored the overarching theme “Research Translated Into Practice” in seven panel discussions titled: Challenges and Solutions to Implementing Evidence-based Practice; The Epidemiology and Clinical Implications of HPV-associated Oropharyngeal Cancer; Efficacy of Mineral Trioxide Aggregate Use for Direct Pulp Capping in Adults; Digital Dentistry: Evidence for Clinical Efficiency and Efficacy; Third Molars: To Extract or Not to Extract?; Personalized Oral Health Care and Its Potential Impact on Dental Practice; and Opportunities for Practitioners to Participate in Research: The National Dental Practice-based Research Network.

CANADIAN ASSOCIATION FOR DENTAL RESEARCH
The 38th Annual Meeting of the Canadian Association for Dental Research, held in conjunction with the 43rd Annual Meeting & Exhibition of the American Association for Dental Research, took place March 19–22, 2014, in Charlotte, North Carolina, USA. The meeting attracted 2,665 attendees from 42 countries, 99 delegates were from Canada.

The Distinguished Lecture Series speakers were: Pamela Robey, National Institutes of Health—National Institute of Dental and Craniofacial Research, Bethesda, Maryland, USA, who spoke on “Stem Cells in Tissue Engineering and Regenerative Medicine”; Ronald Dubner, University of Maryland Dental School, Baltimore, Maryland, USA, who spoke about “The Transition From Acute to Persistent Pain After Orofacial Nerve Injury”; and Lawrence Appel, Johns Hopkins Medical Institutions, Baltimore, Maryland, USA, who spoke about “Dietary Approaches to Prevent and Treat Elevated Blood Pressure.”

MEXICAN DIVISION
The Mexican Division of the IADR and the National Autonomous University of Mexico School of Dentistry organized the “10th International Meeting on Periodontal Biology.” This program was held November 20-21, 2014, in Mexico City. The meeting was a tribute to the memory of the late IADR Past President Barnet M. Levy, who spent many years at the University as a professor, leader and mentor of many students. The theme of the meeting was “Peri-odontal Ligament: The Therapeutic Potential of a Unique Tissue.” Invited speakers included IADR Past President Mary J. MacDougall, and IADR members Rena D’Souza and Yvonne Kapila.

Pan European Region
(British, Continental European, Irish, Israeli and Scandinavian Divisions, and Russian Section)

The 7th International Association for Dental Research/Pan European Regional Congress (IADR/PER) took place in Dubrovnik, Croatia, September 10–13, 2014. Members of the Scientific Committee representing all the PER Divisions/Sections designed a conference that provided first-hand information on recent research developments and breakthroughs, current and future trends. Additionally it provided an ideal opportunity for international exchange and networking. More than 1,000 delegates from 60 countries attended the Congress. Those attending the meeting could choose from among 680 scientific presentations, including 12 symposia, 3 award lectures, 496 poster presentations and 169 oral presentations.

2013 OPERATIONAL HIGHLIGHTS

Sources of Revenue
US $5.6 Million

Expenses Incurred Under Programs and Management
US $4.9 Million
IADR to Expand its Distinguished Scientist Awards Program to Include the IADR Global Oral Health Research Award

The IADR Distinguished Scientist Award – Global Oral Health Research Award honors IADR Past President John Greenspan. He is also the founding president of the IADR Global Oral Health Inequalities Research Network (IADR-GOHIRN). This new award recognizes scientists who have made outstanding significant scientific contribution. In its first year, the award will be supported by Church & Dwight Co., Inc.

IADR to Launch the IADR Joseph Lister Award for New Investigators

Next year, the IADR Joseph Lister Award for New Investigators will be instituted. This award will be managed by IADR and supported by Johnson & Johnson Consumer & Personal Products Worldwide Division of Johnson & Johnson Consumer Companies, Inc. This Awards Competition will award young investigators with original research in oral disease prevention or oral health promotion.

The Journal of Dental Research to Unveil New Look and Add Subtitle That Emphasizes Broad Scope

The January 2015 issue of the Journal of Dental Research (JDR) will feature a newly-designed look and new subtitle: the journal for dental, oral and craniofacial research. In the 94th volume year of the JDR, the new subtitle will comprehensively capture the evolution of dental research to include oral and craniofacial advances. This expanded scope is consistent with contemporary broad-based research the Journal seeks out and publishes.

IADR/AADR to Publish JDR Special Issue

The Journal of Dental Research has announced the publication of a special issue in the fall 2015 highlighting the latest developments in the field of craniofacial stem cells. This peer-reviewed special issue will provide an assessment of the current state-of-the-art of the biology of stem cells in craniofacial development and health, as well as their role in the etiology of diseases/conditions affecting craniofacial tissues. The issue will be of interest to all oral health researchers and practitioners.

Membership in a Scientific Group/Network to Become a Membership Benefit

An exciting new benefit for 2015 is that IADR/AADR membership will include complimentary membership in one of the 30 IADR Scientific Groups and Networks. Scientific Groups and Networks are the backbone of the Associations and participation will afford members the opportunity to engage with prominent researchers around the globe, which will further enhance the overall membership experience. As always, members can join additional Scientific Groups or Networks for an additional fee, but the first one is now complimentary and part of overall membership.

FUTURE MEETINGS

2015: The 93rd General Session & Exhibition of the IADR, held in conjunction with the 44th Annual Meeting of the AADR and the 39th Annual Meeting of the CADR, will take place March 11–14, in Boston, Massachusetts, USA.

2016: The 94th General Session & Exhibition of the IADR, held in conjunction with the 3rd IADR Asia Pacific Regional Meeting and the 35th Annual Meeting of the IADR Korean Division, will take place June 22–25, in Seoul, Republic of South Korea.

2017: The 95th General Session & Exhibition of the IADR, held in conjunction with the 46th Annual Meeting of the AADR and the 41st Annual Meeting of the CADR, will take place March 22-25, in San Francisco, California, USA.

2018: The 96th General Session & Exhibition of the IADR, held in conjunction with the IADR Pan European Regional Congress, will take place July 25–28, in London, England, UK.

2019: The 97th General Session & Exhibition of the IADR, held in conjunction with the 48th Annual Meeting of the AADR and the 43rd Annual Meeting of the CADR, will take place June 19–22, in Vancouver, B.C., Canada.
