2. **Membership Report** (as of [ ] ) *(To be reviewed by IADR Global Headquarters)*

Amount of dues per member:
Full members:
Retired members:
Student members:

3. **What is the date and location of your 2013 meeting (if applicable)?**

AGM will be held in Seattle Washington on Thur, March 21, 2013 at the Washington Convention Centre.

4. **Prior and Planned Activities for 2012 – 2013**

See separate sheets attached.
In 2011 – 2012 CADR engaged in the following activities:

- CADR awarded 6 CADR-IMHA Student Research Awards in 2011. Four of the winners attended the AADR/CADR meeting in Tampa, Florida and two represented Canada at the Hatton award competitions in Iguacu Falls, Brazil. Trainees working in dental and oral health research in Canada applied for a CADR Student Research Award by submitting a manuscript describing their studies. The competition was judged and winners selected by a panel of leading oral health researchers from across Canada.

  The 4 winners presenting their research in Tampa were:
  - Vahid Ravaghi, McGill University – 1st place in the Senior Clinical Science category
  - Shawna Kim, The University of Western Ontario – 2nd place in the Senior Basic Science category
  - Mandeep Sood, University of Toronto – 3rd place in the Senior Basic Science category
  - Adila Khan, McGill University – 2nd place in the Junior category

  The two Hatton award competitors were:
  - Patricia Brooks, The University of Western Ontario – 1st place in the Junior category
  - Farhan Khan, Dalhousie University – 1st place in the Senior Basic Science Category

  Both competitors received 2nd place in their respective categories at the Hatton competition. CADR hosted a well-attended award dinner for the Canadian Hatton competitors in Iguacu Falls, Brazil.

- The fourth and last competition of the CADR-Quintessence-ACFD Visiting Professorship took place in 2011 – 2012. Dr. Mario Brondani from The University of British Columbia was selected as a winner in 2011. He will visit McGill University in Montreal to explore opportunities for future collaborations and present research talks. Dr. Brondani’s research focuses on dental education, curriculum development, public health and community services. The Visiting Professorship provides an excellent opportunity for recently appointed oral health researchers to visit universities anywhere within Canada and engage in discussions on possible collaborative projects or technical exchanges.

- Dr. Walter Siqueira, one of the two CADR Councilors-at-Large, acted as the CADR Student Research Group (SRG) liaison. Dr. Siqueira continued his efforts in revitalizing the SRG and coordinated activities between the chapters of the SRG. The Toronto SRG chapter was invited to provide a presentation at the CADR AGM in Tampa, Florida about their activities and successes.

- CADR conducted ongoing discussions with the American Association for Dental Research (AADR) and Mexican Association for Dental Research (MADR) regarding the establishment of the new North-American Region (NAR). As a result, the Constitution and By-Laws for the new North American Region (NAR) were ratified at the IADR meeting in Iguacu Falls, Brazil, in July 2012. Dr. Edwin Yen from The University of British Columbia also continued his dedicated service as CADR’s NAR representative and the inaugural NAR Regional Board Member on the IADR Global Board of Directors.

- CADR achieved some success in recruiting members for its new Institutional Membership category, primarily geared towards Canadian Educational institutions. 2 institutions – Dalhousie University and the University of Montreal joined this category in 2012. Other institutions indicated interest in joining this new category for 2013.

- CADR actively contributed to the organization and success of the AADR/CADR meeting in Tampa, Florida in March 2012 and held a well-attended Annual General Meeting and Reception for its members at the meeting.

- Elections were conducted in the fall of 2011 and a new Councilor-at-Large, Dr. Ana Velly from McGill University took up her position for the 2012 – 2014 term.

- A Letter of Intent was submitted to the IADR Regional Development Program in the fall of 2011. Although the application received CADR’s full endorsement, it was not invited to the next stage of the competition.

- In the fall of 2011 the Canadian Institutes of Health Research (CIHR) launched a new funding opportunity for oral health researchers in Canada. The objective of this was to support the creation and/or further development of formal networks by encouraging national and/or international collaboration, resource sharing, capacity building and dissemination in priority research areas. CADR took an active role in coordinating discussions regarding the submission of an application with Canada-wide participation. The
new Network in Oral Health Research was successful and received funding from CIHR in the summer of 2012.

- CADR continued its discussions with the Institute of Musculoskeletal Health (IMHA) and Canadian Institutes of Health Research (CIHR) to ensure that oral health research remains a priority in their funding plans. In April 2012 CADR submitted a position statement in response of the Federal Budget announcement, stressing the importance of oral health research and its benefits to Canadians. An Institute Advisory Board member of IMHA, Dr. Jeff Dixon, regularly attends the CADR Executive’s teleconferences to provide updates about new initiatives, funding opportunities and to disseminate information that might be an interest of the oral health research community in Canada. These updates are also regularly included as news items in the membership emails.

- CADR promoted the visibility of oral health research by providing a presentation for the CDA meeting in April 2012. Dr. Matthews also attended the Association of Canadian Faculties of Dentistry (ACFD) meeting that was held in conjunction with the ADEA meeting in Orlando, Florida in March 2012 to provide an update about CADR activities.
CADR’s priorities and planned activities for 2012–2013 are:

- Continue to work with IMHA and CIHR to ensure that oral health research remains a priority in their funding plans.

- Take an active role in the newly established Oral Health Research Network encompassing a wide-range of oral health researchers Canada-wide.

- Actively promote institutional membership to educational institutions in Canada and pursue partnerships and sponsorship opportunities with industry partners and government agencies.

- Promote membership in CADR/IADR among Canadian oral health researchers, undergraduate and postgraduate dental students.

- Actively seek sponsors for the CADR Student Research Award and for the CADR Visiting Professorship.

- Revitalize the CADR Student Research Group and provide guidance and organizational support for their activities.

- Continue to work with IADR and AADR to plan a successful IADR/AADR/CADR meeting in Seattle, Washington in March 2013.

- Continue discussions with IADR/AADR and MADR to finalize a Memorandum of Agreement for the North-American Region.

- Pursue collaborations within the North-American Region and provide leadership in the organization of a potential IADR Regional Development application.

- Continue to work with IADR on issues of mutual interest.
