

HANDS-ON WORKSHOPS

ALL SESSION TIMES ARE IN CHINA STANDARD TIME (UTC +8)

Wednesday, June 22, 8 a.m.-9:30 a.m.

HOW #1: Workshop for Robotic-Assisted Implant Placement Technology

Organizer(s): Peixi Liao (Boston University, USA)

Sponsoring Group/Network(s): Implantology Research, Prosthodontics Research

Description: In this workshop, we would offer a lecture and live demonstration program and we would review the most current evidence/literature while presenting the different workflows of the Yomi (Neocis, Inc, USA) robotic-assisted implant placement technology. The presentation will cover the necessary required steps for treatment planning, digital wax-ups, implant planning, and subsequent implant placement. The attendees would benefit from a live session demonstrating and experiencing the technology and place a dental implant robotically in a simulated environment.

Attendance limited to 50.

Wednesday, June 22, 12 p.m.-1:15 p.m.

HOW #2: Meet a Mentor Networking Session for New Investigators

Organizer(s): IADR Global Headquarters

Sponsoring Group/Network(s): International Association for Dental Research (IADR)

Description: The Meet-a-Mentor Networking Session format is designed to enhance the learning experience for new investigators. This is an opportunity for all new investigators to network with noted mentors in specific research fields. Senior scientists will lead motivational and realistic discussions about the paths they took during their academic careers. Zoom rooms will be organized by research topic or career pathway and one mentor will be assigned to each room. When registering, participants do not need to select a specific table and are free to move among topics/tables during the session.

Ticketed event \$25. Attendance limit to 125.

Friday, June 24, 2 p.m.-3:30 p.m.

HOW #3: Publishing Your Manuscript: A *JDR* Perspective

Organizer(s): Nicholas Jakubovics (Newcastle University, England)

Sponsoring Group/Network(s): International Association for Dental Research (IADR)

Description: Dissemination of research is critical to its uptake by other researchers and translation by end-users. This session will consider how best to reach your target audience and aims to assist you in how to present your research in a clear and logical manner for publication in scientific journals with particular emphasis on the *Journal of Dental Research*, although much of the session will be pertinent to scientific publishing in general.

Friday, June 24, 8 p.m.-9:30 p.m.

HOW #4: The Graduating European Dentist Taskforce: Domain 5 - Research

Organizer(s): James Field (Cardiff University, Wales)

Sponsoring Group/Network(s): Education Research, Student Training and Research (STAR) Network

Description: The 'Graduating European Dentist' curriculum is a suite of documents published in 2017 following two years of work with a dedicated taskforce comprising various representatives from European partner countries. The curriculum was developed using a learning outcomes-based approach which facilitates the process of constructive alignment. The learning outcomes were determined followed a process of comprehensive curriculum inventory, and were considered by all stakeholders through a period of open consultation. To date, the curriculum documents have been cited over 180 times since their publication, and institutions globally continue to use them to formulate their local curricula – there is also now an online digital resource dedicated to the curricula: <https://adee.org/projects/graduating-european-dentist/graduating-european-dentist-resource-pages>. The 4 current domains are: 1. Professionalism, 2. Safe and effective clinical practice, 3. Patient centred care, 4. Dentistry in Society. It is the intention of the taskforce to introduce a much-needed 5th domain – 'Research'. Given the existence of IADR and its pivotal role in coordinating, supporting and disseminating research, it seems entirely appropriate that key stakeholders, and delegates, should be invited to help shape this new domain.
